Percentage share of all Tri-County Households in each income group found within the City of Peoria.

The City represents 37% of all Tri-County Households, so if we were perfectly representative of the larger area, all of the blue columns would end at the red line.

Columns above the red line indicate a higher than average share of a specific income group and columns below the red line indicate a lower than average share.

All data from the US Census Bureau, 2011 ACS Data
