AGENDA ITEMS

ITEM NO. 1. REPORT from FOTH INFRASTRUCTURE & ENVIRONMENT, LLC

A. SPECIAL WASTE APPROVALS AS NEEDED

Mr. Sloan stated there was one new profile that required the Committee's approval. He said the first requiring approval was for Waste Management for Wash Bay Sediment (no liquids), which
was an annual event. He stated that Foth had no technical objections to this waste stream. He explained that Waste Management submitted this profile as a renewal; however, no record could be found that showed the original profile was approved by the Committee; therefore, it was being presented to the Committee as a new waste stream.

Mr. Sloan stated that there were two profiles that were granted administrative approval and two pre-approved renewals. The first waste stream for the City of Peoria for Treated Wood was granted administratively by Mr. Smith on February 6, 2013. The second waste stream for John Maubach Construction for Treated Wood was granted administratively by Mr. Smith on February 7, 2013. He stated that Foth had no technical objections to these waste streams and that no action was required.

Mr. Morris moved to approve the special waste approvals for Waste Management of Peoria for waste streams, as outlined; seconded by Ms. Scott-Pearson.

Approved by viva voce vote.

B. PERMIT APPROVALS AS NEEDED

Mr. Sloan stated that a number of reports were required to comply with the air permit issued to the site. He stated that the semi-annual air monitoring report included a report containing data from the required monitoring events at Landfill No. 1 & Landfill No. 2 and summarized any deviations from the permit requirements. He stated the report was due to the IEPA by March 1, 2013.

Mr. Sloan stated that the Annual G04S Evaluation was a report on the ongoing corrective action measures and progress. He explained that the report included discussions regarding the previous year’s groundwater concentration results; headspace monitoring results and operation; maintenance and upgrades of the gas collection; and the control system associated with G04S.

Mr. Sloan stated the CQA report details the Leachate Extraction Improvements project at Landfill No. 1. He explained, as part of the improvements, Walker Excavating installed solar powered pumps and new force main lines to remove leachate from the landfill and route it to an existing 10,000 gallon tank to where it would be hauled offsite for treatment. He said the report provided documentation from Foth’s construction observation activities as evidence to IEPA that the improvements were constructed according to the specifications and the CQA Plan.

Mr. Sloan stated that there were some issues with the flare in January. He said the flare was freezing and shutting down. He said once the flare had been shut down for a period of (5) days or longer then the agency had to be notified. He explained that this permit would also need Mr. Bergsten’s signature.

Mr. Sloan stated that he did not expect needing additional signatures for permit applications prior to the next Committee meeting, but requested approval to obtain Mr. Bergsten’s signature should the need arise.
C. Gate Audit

Mr. Sloan stated that, in accordance with the special waste procedures, a gate audit was performed to ensure all procedures and requirements for special waste acceptance at the landfill were being met. He said the audit was performed by Foth on December 14, 2012.

Mr. Sloan stated that Waste Management was conducting random load checks three times per week. He stated that Waste would provide monthly summary reports to the Committee.

Mr. Erni explained that random load checks were done in January 2013. He stated that Mr. Wiersema would give an update at the next meeting and he reiterated that Waste Management would provide the summary report at the Committee’s next monthly meeting.

D. Landfill #1 - Financial Information

Mr. Sloan gave a brief overview regarding the information that was previously requested at the last meeting. He presented the Engineering and Operations Services Activity for 2013, which covered the 2012 expenses along with the actual monthly expenses for 2013. He explained that the last column in the spreadsheet represented the expenses that are attributable to Landfill No. 1.

Mr. Sloan also presented the long term budget plan through 2028. He stated that the post closure care period for Landfill No. 2 would end in 2028.

E. Updates Regarding Compliance Activities, Measures & Progress

Mr. Sloan gave a brief update of the current status of the groundwater issues for Landfill No. 1. He stated that the groundwater wells are sampled on a semi-annual basis (2nd and 4th quarters). He explained that the samples test for the concentration of a number of parameters which are compared to their respective Applicable Groundwater Quality Standard (AGQS), which was considered as Detection Monitoring or Routine Sampling.

Mr. Sloan outlined the False Positives and AGQS Adjustments. He stated there were 11 false positive increases observed during the 4th quarter (2012) sampling event. He explained that these increases would be re-sampled during the 1st quarter of 2013. He further explained that an application to raise the AGQS value for total nitrate-nitrogen equal to the nitrate (as nitrogen, dissolved) was submitted and is awaiting Agency review. He said that this should eliminate some of the false positive errors that have occurred regarding total nitrate-nitrogen. He stated that, as a part of the corrective action the volatile organic compounds at G02S and G04S would continue to be addressed by the gas collection system and would further be addressed with the leachate collection improvements.

Mr. Sloan addressed the Chloride issues. He explained that the Agency requested additional information regarding the assessment monitoring report proposing to raise the AGQS value for Chloride. He said the information was submitted and was awaiting final action from the IEPA, which would be due by March 1, 2013. If approved, he said the new AGQS value would mitigate most of the issues with Chloride. One well, G06S, would require additional investigation as the chloride value would remain higher than the new AGQS value, he said. He pointed out that the proposed AGQS value was significantly less than the drinking water standards.
In discussion with Chairman Bergsten regarding the drinking water standards, Mr. Sloan stated that the Clean Water Standard for chloride was actually 250 parts per million. He stated that the chloride background proposed for the landfill would be approximately seven times lower than that.

Mr. Sloan noted that PDC hired Shaw Environmental to conduct an independent study to determine whether the landfill gas would be profitable. He stated that Foth had discussed Landfill No. 2 gas with Waste Management with some potential of putting the two gas streams together; however, PDC would have to determine whether they would want to utilize the gas from Landfill No. 1.

Mr. Sloan stated that someone was interested in building a greenhouse approximately 200 miles from Chicago. He said the idea was to use landfill gas to heat the greenhouse.

Mr. Erni explained that Waste Management currently has a facility at the gas plant to run the engines to make electricity. He said the heat that was created by the engines during the generation process was diverted to the greenhouse. He said that they would get the benefits from the electricity and would also be able to take advantage of the heat that would normally be wasted through the radiators by diverting it to the greenhouse. He stated that they were currently heating a four (4) acre greenhouse with a (4) engine gas plant. He further explained if they could make some processing improvements, they would be able to increase the amount of heat and size of the greenhouse.

Mr. Sloan stated that in Northern Iowa they were using landfill gas to heat greenhouses. He stated that they were paying approximately $5,000 per month to heat the greenhouses, and he said he felt this would be another revenue source that the Committee could consider in the near future.

Mr. Van Winkle moved to approve Foth's report, as outlined, including securing Mr. Bergsten's signatures for the Clean Air Act Permit Program (CAAPP) Semi-Annual Air Monitoring Report; Annual G04S Corrective Action Evaluation; and Construction Quality Assurance (CQA) Report for the Leachate Extraction Improvement; seconded by Mr. Spain.

Approved by viva voce vote.

**ITEM NO. 2: REVIEW VARIOUS LEASE RENEWALS**

Mr. Smith gave a brief overview of the upcoming renewals. He stated that the Committee had expressed an interest in increasing revenues. He felt that other options may exist by increasing the rental rates or increasing the hunting leases on the 305 acres, especially when the grazing leases expire (May 1st – September 30th). Based on the Committee's direction today, he stated that the renewals could be placed on the March agenda for approval.

Mr. Smith noted that the Grazing Lease would not expire until 2014 with an annual rate of $2,300; the Farming Lease would expire on April 30, 2013, with an annual rate of $2,625; the Planting Clover & Sunflowers/Hunting & Fishing Lease would expire on March 31, 2013, with annual rate of $800; and, the Hunting & Fishing Lease would expire on May 31, 2013, with the annual rate of $400.
Mr. Morris thanked staff for the information and he said he hoped that the Committee would not approve the renewals until they received the appraisals. He said, once the appraisal was received, he did not want the leases to prevent the Committee from selling the land, if that would be an option.

Chairman Bergsten stated that the language could be modified in the contract to address the sale of the land and termination of the lease, if the property were to be sold prior to the expiration of the leases.

Mr. Harenburg stated that the property that he currently leases could not be sold, but would be turned over to PDC for Landfill No. 3.

Mr. Wyatt asked the Committee to consider renewing the lease agreement for insurance purposes for one year. He said he did not want to leave the property open to the public. He said, under the current Agreement, the Committee reserved the right to terminate the Agreement upon providing a (7) seven day written notice.

In discussion with Mr. Van Winkle, Mr. Smith stated that Mr. Herb Meyer would be conducting the appraisal. He explained that the Committee would receive the appraisal in early April.

Mr. Smith expressed concern regarding the renewal for the Farming Lease. He said he felt that the appraisal would be received too late in order for the farmers to plant their crops. He suggested the Committee extend the lease agreement for one year, with contingencies placed within the agreement to allow for sale of the land.

Mr. Spain said he concurred with Mr. Smith. In response to his question of whether the appraisals could be completed in March for the next Committee meeting, Mr. Smith stated that Mr. Meyer had not yet started on the appraisals for the Landfill.

Mr. Spain stated that he felt that it was difficult to renew the leases without this appraisal. He stated he would like to have this information next month, if possible.

Mr. Morris suggested that Mr. Giebelhausen review the leases with Mr. Smith. He said he felt that, if Mr. Giebelhausen was comfortable with the language in the Agreements, then the Committee could move forward or modify the language to reflect the sale of the property.

**ITEM NO. 3: LANDFILL BUDGET AND FINANCIAL REPORT**

Mr. Smith stated that there were some discrepancies with the budget report that was included in the packets. He stated a corrected report would be sent out early next week to the Committee.

Mr. Smith distributed a tonnage report from PDC that reflected past trends from 2010 – 2013 for trash, compost and recycling.

Mr. Spain questioned if the same methodology could be applied to show the trend lines for several years for the Landfill.
ITEM NO. 4: REPORT FROM WASTE MANAGEMENT, INC.

A. MONTHLY ACTIVITY REPORT

Mr. Erni gave a brief overview of the monthly summary report, profiled waste log and the year-over-year comparison chart for January 2013.

B. PERMIT APPROVALS AS NEEDED

Mr. Erni stated that there were (4) reports that would require Mr. Bergsten's signature. However, he said that they did not anticipate any other permit requests. He asked the Committee to allow administrative approval of permits for signature by the City Designee, after review by FOTH, if permits were required prior to the March meeting.

Mr. Van Winkle moved to approve Waste Management's report, as outlined, including securing Mr. Bergsten's signatures for the Annual Closure and Post Closure Estimate Updates (both sites); Landfill No. 1 Bureau of Land Annual Report and Certification; Landfill No. 2 Annual Landfill Capacity Certification; and Annual Air Emission Report (entire site) with authorization for further administration approval prior to the March meeting, as requested; seconded by Mr. Spain.

Approved viva voce vote.

ITEM NO. 5: REPORT FROM PEORIA DISPOSAL CO.

A. UPDATE ON LANDFILL NO. 3 PERMIT APPLICATION – PERMIT REVIEWER ASSIGNED

Mr. Coulter stated that PDC received a letter from the IEPA stating that the permit application was incomplete. He said the requested information was included in the application and that Rich with Shaw Environmental was in the process of contacting the IEPA's permit reviewer, Ken Smith. He stated that Bob Caldwell was the permit reviewer for Landfill No. 2.

B. UPDATE ON DEVELOPMENT OF THE CITIZENS CONVENIENCE CENTER APPLICATION

Mr. Coulter stated that the goal was to have the application filed before November 2013. He said that the work needed to be completed within two years or the siting approval process would start over. He stated that he met with Shaw Environmental last week to discuss the permit process plan. He said he requested that the permit application be submitted to Foth by May 2013. He explained that Foth would then have 60 days to review the application. He said that the goal was to have the Committee approve the application at its August 2013 meeting then the Committee's approval would be forwarded to both the County Board and the City Council for approval. He further explained that, after the permit application was approved by both governing bodies, he would then file the application with IEPA, which would leave the months of October and November to work on any discrepancies they found. He stated this was the first time a convenience center had ever been sited in Illinois.

Mr. Coulter said he with Veolia Environmental Services the previous week, and that they are one of the largest environmental firms with numerous household hazardous waste collection programs in Illinois. He stated they had been one of the contractors for the IEPA. He explained the purpose of his meeting with Veolia was to have them review Shaw's work and to get their
input on the design and functionality of the center. He said he also asked Veolia to prepare a proposal to operate and develop a health/safety plan for the facility until PDC had the expertise to operate. He stated that Veolia would be meeting Shaw next month.

C. UPDATE ON DEVELOPMENT OF THE LANDFILL NO. 3 – WETLAND PERMIT APPLICATION

Mr. Coulter stated that he would focus on this permit application during the second half of the year, which would be reviewed by the US Army Corp of Engineers.

D. UPDATE ON LANDFILL NO. 1 – METHANE GAS STUDY

Mr. Coulter stated that, under the current contract, PDC would have first rights to the methane gas; however, before they give up the opportunity to utilize the gas, PDC has requested an in-depth study to be prepared by Shaw Environmental. He said these efforts would be coordinated with Foth. He said he would like to have the report from Shaw within the next six (6) months.

Mr. Coulter announced that Shaw Environmental had been purchased by Chicago Bridge and Iron (CBI).

Mr. Sloan corrected that PDC had the first option, not first rights, to do something with the methane gas.

Mr. Morris moved to approve Peoria Disposal’s report; seconded by Ms. Scott-Pearson.

Approved by viva voce vote.

UNFINISHED BUSINESS

- Status of Appraisals for the Undeveloped 600 Acre Parcel

Mr. Smith stated that Mr. Herb Meyer was hired to prepare the appraisal for the undeveloped parcel. He said he anticipated that the appraisal would be completed by April 2013.

AGENDA DATE REQUESTED: March 20, 2013

ACTION REQUESTED: Financial Information and Waste Receipts. No action required.

BACKGROUND: The following attachments provide information requested by the Committee:

Engineering and Operations Services Activity for 2013 – Presents by category the 2012 expenses, 2013 budget and actual monthly expenses for 2013. The last column lists the expenses that are attributable to Landfill No. 1.

Peoria City/County Landfill Waste Receipts – Chart tracks the overall waste receipts at the landfill. It tracks both the airspace and tonnage on an annual basis. When LF2 first started, the concern was not filling it up too fast. The cap is based on an average airspace usage of 460,000 cubic yards. We've been tracking how much airspace WMI “had in the bank” if they wanted to increase up to the cap. The other way to look at the annual cap was that the landfill had to last until 2014, which should not be a problem since the last projections estimated the landfill will last to approximately 2019 - 2022. WMI will be conducting another survey soon at which time Foth can update the analysis and provide a better estimate on the remaining life of Landfill No. 2.

BACKGROUND: Roger Beecher of Beecher Farms has leased this 21-acre area from the City/County Landfill since 1993 without issue. The one-year term is in keeping the expiration dates consistent with all of the Lease Agreements with the Peoria City/County Landfill Committee.

FINANCIAL IMPACT: NA

This Lease is entered into this __________ day of March 2013, between, City of Peoria, an Illinois Municipal Corporation, the County of Peoria, a Body Politic and Corporate, in joint tenancy by and through Joint City/County Solid Waste Committee (Landlord), and, Roger Beecher and Kiley Beecher of Beecher Farms, 2511 North McAllister Road, Hanna City, Illinois 61536 (Tenant).

A. PROPERTY:
The Landlord hereby leases to the Tenant, to occupy and use for agricultural-related purposes only, the following described property:

17.3 acres in Section 35, Northeast 1/4; 3.8 acres in Section 25, Northwest 1/4, south of Cottonwood Road, both in Rosefield Township combined consisting of 21 acres, more or less.

B. DEFINITIONS:
1. Crops include pastures.
2. The Farm Manager shall be the Landlord’s authorized representative on all matters herein.

C. PROPERTY RIGHTS:

2. Right of Entry. The Landlord reserves the right of itself, its agents, its employees, or its assignees to enter the farm at any reasonable time for purposes of consultation with the Tenant, to make repairs, improvements, and inspections, and to develop mineral resources. Where practicable, the Landlord will develop mineral resources and/or conduct mining operations in a manner so as to leave this lease arrangement unaffected. However, the Landlord reserves, at its option, the right to terminate this lease if, in the Landlord’s discretion, this lease interferes with or does not permit the development of mineral resources and/or mining operations. In the event notice of termination of the lease is given so that the Landlord may develop mineral interests and/or conduct mining operations, Tenant agrees that he shall cease all use of and operations on the property and shall remove himself and all of his personal property within thirty (30) days of the notice of said termination of the lease.
3. The Landlord reserves the right to develop and lease the land for mineral exploration or production and to grant rights-of-way for roads, pipelines, power lines, etc. Fair market value will be paid to the Tenant for all crops damaged.

   2. The Tenant will comply at all times with all requests and directions made and issued by the Farm Manager, which include providing the Farm Manager with all information necessary to complete any and all inventories and reports.

E. IMPROVING, CONSERVING, AND MAINTAINING THE FARM:
To improve the farm, conserve its resources, and maintain it in a high state of cultivation, the two parties agree as follows:

   1. Good Husbandry. The Tenant may, at any time this lease is in effect or within thirty (30) days after termination of this lease, remove such improvements provided he leaves in good condition that part of the farm from which they are removed.
