Public Meeting Purpose

1. Share information about the proposed work to be completed at the MacArthur Bridge.
2. Collect feedback from the public and users about the proposed work.
3. Summarize the feedback and present it to the funding authorities.
4. Incorporate the feedback into the design process of the proposed work.
MacArthur Bridge Replacement

Brief History

- 1942 – Constructed.
- 2012 – Weight limit posted.
- 2014 – Resurfaced with temporary asphalt.
- 2015 – MacArthur Highway was restriped.
Brief Project Background

- 2013 – A bridge inspection was completed by IEI and concrete cores analyzed.
- 2014 – IDOT representatives determined the bridge was in very poor condition (rated 3 out of 100) and approved funds for replacement of the bridge by 2018.
- 2015 – IDOT’s Cultural Resources Unit (CRU) determined that the bridge was eligible for Historic Preservation and requested a Section 106/4(f) Report.
Section 106/4(f) Evaluation

- **Do nothing.** This is not an acceptable solution. The condition of the bridge warrants action for user safety. The bridge will continue to deteriorate.

- **Build on a New Location Without Using the Old Bridge.** This is not an acceptable solution. It is a thoroughfare for the Moss Community and Bradley University to the Heart of the City. Realigning the roadway adjacent to the bridge would cut into the Moss Bradley Historical District.

- **Rehabilitation Without Affecting the Historic Integrity of the Bridge.** This is not an acceptable solution. The concrete used in the 1940’s cannot be amended. Concrete rehabilitation requires removal and replacement of the material.
