Questions from January 23 Meeting

• Can we add a right turn lane on the north leg of the Imperial/Northmoor intersection?
  • Required getting to close to a home

• Where should eastbound Northmoor traffic access Richwoods?
  • Same place as currently, except during certain phases of road construction

• What about providing for pedestrians and school drop offs during construction?
  • We will add language to the construction contract about this issue. Good idea.

• Can Northmoor be a ‘no truck’ route?
  • No, Northmoor is designated as a major street. The new pavement is designed to handle truck traffic.

• Cut-through traffic on Rosemead?
  • Minimal expected, and most will be from the neighborhood

• Can the new roads handle traffic with commercial development?
  • Yes. (Go to traffic simulation)
What will New Northmoor Road look like?

- 5’- wide sidewalk on the north side
- 10’- wide bike/walktrail on the south side
- Three lanes for vehicular traffic
- Curbs and gutters
- Pedestrian-scale street lights
- Native trees and vegetation
