DATES SET:

**WEDNESDAY, June 17, 2015 @ 8:00 a.m.**
REGULAR COMMITTEE MEETING – To be held at the Lester D. Bergsten Operations & Maintenance Building, 3505 N. Dries Lane, Peoria Illinois 61604.

**WEDNESDAY, July 15, 2015 @ 8:00 a.m.**
REGULAR COMMITTEE MEETING – To be held at the Lester D. Bergsten Operations & Maintenance Building, 3505 N. Dries Lane, Peoria Illinois 61604.

**WEDNESDAY, August 19, 2015 @ 8:00 a.m.**
REGULAR COMMITTEE MEETING – To be held at the Lester D. Bergsten Operations & Maintenance Building, 3505 N. Dries Lane, Peoria Illinois 61604.

---

PEORIA CITY/COUNTY LANDFILL COMMITTEE
AGENDAS AND MINUTES
ISSUED BY:
LESTER D. BERGSTEN, CHAIRMAN
via the PUBLIC WORKS DEPARTMENT
3505 N. Dries Lane
(309) 494-8800
INTERNET ADDRESS: www.peoriagov.org

To access electronic Agenda & Minutes (only):
1. www.peoriagov.org
2. Click "Boards/Commissions" tab @ the top
3. Choose Solid Waste Disposal Committee (Landfill)
4. Scroll to the bottom of the screen. Under "Agenda & Minutes" will be a list of the .pdf postings.
5. Select desired document and double click to open.

*CITIZENS WISHING TO ADDRESS AN ITEM NOT ON THE AGENDA SHOULD CONTACT A COMMITTEE MEMBER PRIOR TO THE MEETING. ALL OTHER PUBLIC INPUT WILL BE HEARD UNDER PUBLIC COMMENT AT THE BEGINNING OF THE COMMITTEE MEETING.

NOTE: THE ORDER IN WHICH AGENDA ITEMS ARE CONSIDERED MAY BE MOVED FORWARD OR DELAYED BY AT LEAST 2/3 VOTE OF THE COMMITTEE MEMBERS PRESENT.

THE PEORIA CITY/COUNTY LANDFILL COMMITTEE MEETS IN REGULAR BUSINESS SESSIONS THE THIRD WEDNESDAY OF THE MONTH (JANUARY THROUGH NOVEMBER) AT 8:00 A.M. AT LESTER D. BERGSTEN OPERATIONS & MAINTENANCE FACILITY CONFERENCE ROOM, 3505 N. DRIES LANE, PEORIA, ILLINOIS.

DURING THE MONTH OF DECEMBER, PEORIA CITY/COUNTY LANDFILL COMMITTEE WILL NOT MEET UNLESS A SPECIAL MEETING IS CALLED. NOTICES OF ANY SPECIAL MEETING ARE POSTED AT LEAST 48 HOURS PRIOR.
PEORIA CITY/COUNTY LANDFILL COMMITTEE MEETING
DRIES LANE FACILITY CONFERENCE ROOM

MAY 20, 2015 @ 8:00 A.M.

ATTENDANCE

ANNOUNCEMENTS, ETC.

CITIZENS’ OPPORTUNITY TO ADDRESS THE COMMITTEE

MINUTES

REQUEST FOR APPROVAL OF THE PEORIA CITY/COUNTY LANDFILL MINUTES
Dated: April 15, 2015

AGENDA ITEMS

ITEM NO. 1  REPORT FROM FOTH INFRASTRUCTURE & ENVIRONMENT, LLC
A. SPECIAL WASTE APPROVALS AS NEEDED
B. PERMIT APPROVALS AS NEEDED
C. 1ST QUARTER 2015 GROUNDWATER UPDATE
D. UPDATE ON MONTHLY WASTE VOLUMES RECEIVED AT LANDFILL NO. 2
E. UPDATES REGARDING COMPLIANCE ACTIVITIES, MEASURES & PROGRESS

ITEM NO. 2  LANDFILL MONTHLY BUDGET REPORT

ITEM NO. 3  REPORT FROM WASTE MANAGEMENT, INC.
A. MONTHLY ACTIVITY REPORT
B. PERMIT APPROVALS AS NEEDED

ITEM NO. 4  REPORT FROM PEORIA DISPOSAL CO.
A. RECEIVE AND FILE USACOE PROVISIONAL 404 PERMIT FOR VICARY BOTTOMS WETLAND MITIGATION PROJECT
B. UPDATE ON IEPA BUREAU OF WATER 401 PERMIT PROCESS
C. UPDATE ON WIGAND DISPOSAL RECYCLING DROP-OFF LOCATION IN CHILlicothe

UNFINISHED BUSINESS:
• RENEWABLE ENERGY

NEW BUSINESS

NEXT MEETING: JUNE 18, 2015

EXECUTIVE SESSION

ADJOURNMENT
REQUEST FOR DISCUSSION

To: Peoria City/County Landfill Committee Members
From: Joshua Gabehart, P.E., Foth

AGENDA DATE REQUESTED: May 20, 2015

ACTION REQUESTED: Committee approval required for non-special waste profile, 610006IL Advanced Technology Services/Caterpillar and recertification of profile 108244IL Praxair, Inc. Receive and file three (3) additional pre-approved non-special profiles.

BACKGROUND: The non-special waste profile requiring committee approval is from Advanced Technology Services/Caterpillar for discarded hoses and routine municipal solid waste. Two (2) of the pre-approved waste profiles were approved per the Committee’s Petroleum Contaminated Soil and Debris Policy and one (1) was pre-approved per the Committee’s Asbestos Containing Material (ACM) Policy. One (1) pre-approved waste stream, Profile 108244IL from Praxair, Inc., was administratively approved June of 2010 and requires renewal.

Foth has no technical objections for the acceptance of all waste streams listed above.

A memorandum is attached, which reviews all the profiles.

FINANCIAL IMPACT: N/A
MEMORANDUM

TO: Joint City of Peoria - County of Peoria Solid Waste Disposal Facility Board

DATE: May 20, 2015

FROM: Mark Williams

NUMBER: 14P100.14

SUBJECT: Special Waste Permits

Waste Management has presented the following waste stream.

Profiles for Approval (Action is Necessary):

1. Advanced Technology Services/Caterpillar
   8201 N University Dr. Bldg C
   Peoria, IL 61615

   MSW and hoses containing residual oils

   Application
   Dated: 04/06/2015
   Received: 04/22/2015

   Municipal solid waste and discarded transmission and hydraulic hoses containing residual oils.

   Source: Peoria County
   Type: Non-Special
   Profile # 610006IL

   Expected
   Quantity = 42 yards
   Frequency = One-time

   Subject to County Fee = yes
   Last Tested = SDS

Comments: This waste stream is certified by the generator as non-special waste based on SDS sheets. This waste stream contains discarded hoses that contain residual oil and routine solid waste that would normally be disposed of at the landfill. We have no technical objections.

Pre-Approved Waste Streams (No Action is Required. For Information Only)

- Kevin Stimpert, Minonk, IL, Profile 610048IL, Asbestos Containing Material Policy, 15 yards, one-time.
- D.A. Hoerr and Sons Inc., Peoria, IL, Profile 610044IL, Petroleum Containing
Soil and Debris Policy, 1,500 tons, one-time.

- Plotkin Enterprises, LLC, Peoria, IL Profile 610036IL, Petroleum Containing Soil and Debris Policy, 300 yards, one-time.
- Praxair, Inc, Pekin IL, Profile 108244IL, Renewal-Previously Approved Waste Stream, 11 tons, Repeat. Profile expires June 2015.

The profiles are attached.

Committee approval does not relieve the Generator and Landfill Operator from complying with all applicable laws and regulations.
EZ PROFILE™
6100066IL

Requested Facility: Yes

Check if there are multiple generator locations: Attach locations.

A. GENERATOR INFORMATION (MATERIAL ORIGIN)
1. Generator Name: Advanced Technology Services, Inc.
2. Site Address: 8801 North University Dr., Ste. 600
   City, State, ZIP: Peoria, IL 61616
3. County: Peoria
4. Contact Name: Dominique Bathurst
5. Email: nbathurst@dominoes.com
6. Phone: (309) 679-7279
7. Fax: (309) 679-7279
8. Generator EPA ID: N/A
9. State ID: N/A

C. MATERIAL INFORMATION
1. Contaminant Name: Hazardous waste
2. Description of Waste: Contains sludge waste which contain residual oils.
3. Material Composition and Contaminants:
   - See Attached
   - See Attached
4. Material Composition and Contaminants: See Attached
5. State Waste Codes: N/A
6. Color: N/A
7. Physical State at 70°F: Solid
8. Free Liquid Range Percentage: 0%
9. pH: N/A
10. Strong Odor: Yes
11. Flash Point: N/A

E. ANALYTICAL AND OTHER REPRESENTATIVE INFORMATION
1. Analytical attached: Yes
2. Other information attached (such as MSDS): N/A

E. GENERATOR CERTIFICATION (PLEASE READ AND SIGN CERTIFY BY SIGNATURE)
If any provisions of the following do not apply, please note in this space and give reason for exclusion.

Signature: Sheila Bee
Date: 4/21/15

D. REGULATORY INFORMATION
Only questions with a "Yes" response in Section D on the EZ PROFILE™ form (page 1) need to be answered here.

1. EPA Hazardous Waste
   a. Please list all USEPA listed and characteristic waste code numbers:

2. State Hazardous Waste → Please list all state waste codes:

3. Excluded Waste → Please select which of the following categories apply to your material:
   a. Dusted Hazardous Waste
   b. Excluded Waste under 40 CFR 261.4 → Specify Exclusion:
   c. Inert Hazardous Waste Components

4. Underlying Hazardous Constituent → Please list all Underlying Hazardous Constituents:

5. Benzene NESHAP
   a. Are you a TSDF? Yes No
   b. What is your facility's current total annual benzene quantity in Megagrams?
      a) < 1 Mg b) 1 - 9.99 Mg c) ≥ 10 Mg
   c. Is this waste from remediation at an abandoned facility?
      a) Yes b) No
   d. Has material been treated to remove 99% of the benzene or to achieve < 10 ppmw?
      a) Yes b) No
   e. Is material exempt from control in accordance with 40 CFR 61.48?
      a) Yes b) No
   f. Based on your knowledge of your waste and the CERCLA regulations, do you believe that this waste stream is subject to treatment and control requirements at an off-site TSDF?
      a) Yes b) No

6. 40 CFR 83 / S/G/G/C
   a. Does the material contain ≤ 100 ppm volatile organic compounds?
      a) Yes b) No

7. CERCLA or State-Mandated clean up → Please submit the Report of Decision or other documentation to assist others in the evaluation for disposal.

8. NRC or state regulated radioactive or NDPM Waste → Please identify isotopes and quantities:

THINK GREEN:
QUESTIONS? CALL 000 987 4776 FOR ASSISTANCE
**Profile Addendum: State of Illinois**

**GENERATOR'S NON-SPECIAL WASTE CERTIFICATION**

### 1. Additional Waste Stream Information

- **Profile Number:** N/A
- **Generators Name:** Advanced Technology Services-Calessi
- **Generators Site Address:** 8201 North University Dr., Elk Grove Village, IL 60007
  (The location where the waste is generated)
- **Waste Name:** MSW and House containing residual oil

The Illinois Environmental Protection Act allows a Generator to certify that their pollution control waste or industrial process waste, is not an Illinois Special Waste (Section 3.45). By completing the following questionnaire, you may certify that the waste stream represented by the Waste Management Profile referenced above is not an Illinois Special Waste as defined in the Act.

**Is the waste referenced above any of the following:**

<table>
<thead>
<tr>
<th>Question</th>
<th>Yes</th>
<th>No</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. A Potentially Infectious Medical Waste (PIMW)?</td>
<td>☑</td>
<td>☐</td>
</tr>
<tr>
<td>2. A Hazardous Waste as defined in 40 CFR 261 or in 35 IAC 722.111?</td>
<td>☑</td>
<td>☐</td>
</tr>
<tr>
<td>3. A Liquid Waste (fails the paint filter test as defined in 35 IAC 611.107)?</td>
<td>☑</td>
<td>☐</td>
</tr>
<tr>
<td>4. A regulated PCB waste as defined in 40 CFR 752?</td>
<td>☑</td>
<td>☐</td>
</tr>
<tr>
<td>5. A NESHAP regulated asbestos waste other than waste from renovation or demolition?</td>
<td>☑</td>
<td>☐</td>
</tr>
<tr>
<td>6. A waste resulting from the shredding recycled metals (auto fluff)?</td>
<td>☑</td>
<td>☐</td>
</tr>
<tr>
<td>7. A delisted Hazardous Waste or Treated Characteristic Hazardous Waste, subject to LDR requirements under 35 IAC 728.109?</td>
<td>☑</td>
<td>☐</td>
</tr>
</tbody>
</table>

In determining that this waste is not a liquid, I have used knowledge of the processes generating the waste and the attached supporting documentation: ☑ MSDS ☐ Analytical ☐ Other (explain below):

In determining that this waste is not RCRA hazardous, I have used knowledge of the processes generating the waste and the attached supporting documentation: ☑ MSDS ☐ Analytical ☐ Other (explain below):

**8. Is the waste represented by this profile sheet subject to the Illinois Solid Waste Management Act fee?** ☑ Yes ☐ No

By signing below, I certify my waste is NOT an Illinois Special Waste, and that I understand that a person who knowingly and falsely certifies that a waste is not special waste is subject to the penalties set forth in subdivision (c) of subsection (h) of section 44 of the Illinois Environmental Protection Act.

<td></td>
<td>1 - 5%</td>
</tr>
</tbody>
</table>

* All concentrations are percent by weight unless material is a gas. Gas concentrations are in percent by volume.

SECTION 3  HAZARDS IDENTIFICATION

This material is not considered to be hazardous according to regulatory guidelines (see (M)SDS Section 15).

POTENTIAL HEALTH EFFECTS

Excessive exposure may result in eye, skin, or respiratory irritation. High-pressure injection under skin may cause serious damage.

NFPA Hazard ID: Health: 0 Flammability: 1 Reactivity: 0
HMIS Hazard ID: Health: 0 Flammability: 1 Reactivity: 0
NOTE: This material should not be used for any other purpose than the intended use in Section 1 without expert advice. Health studies have shown that chemical exposure may cause potential human health risks which may vary from person to person.

SECTION 4

FIRST AID MEASURES

INHALATION
Remove from further exposure. For those providing assistance, avoid exposure to yourself or others. Use adequate respiratory protection. If respiratory irritation, dizziness, nausea, or unconsciousness occurs, seek immediate medical assistance. If breathing has stopped, assist ventilation with a mechanical device or use mouth-to-mouth resuscitation.

SKIN CONTACT
Wash contact areas with soap and water. If product is injected into or under the skin, or into any part of the body, regardless of the appearance of the wound or its size, the individual should be evaluated immediately by a physician as a surgical emergency. Even though initial symptoms from high pressure injection may be minimal or absent, early surgical treatment within the first few hours may significantly reduce the ultimate extent of injury.

EYE CONTACT
Flush thoroughly with water. If irritation occurs, get medical assistance.

INGESTION
First aid is normally not required. Seek medical attention if discomfort occurs.

SECTION 5

FIRE FIGHTING MEASURES

EXTINGUISHING MEDIA
Appropriate Extinguishing Media: Use water fog, foam, dry chemical or carbon dioxide (CO2) to extinguish flames.

Inappropriate Extinguishing Media: Straight Streams of Water

FIRE FIGHTING
Fire Fighting Instructions: Evacuate area. Prevent runoff from fire control or dilution from entering streams, sewers, or drinking water supply. Firefighters should use standard protective equipment and in enclosed spaces, self-contained breathing apparatus (SCBA). Use water spray to cool fire exposed surfaces and to protect personnel.

Hazardous Combustion Products: Smoke, Fume, Aldehydes, Sulfur oxides,Incomplete combustion products, Oxides of carbon

FLAMMABILITY PROPERTIES
Flash Point [Method]: >200°C (392°F) [ASTM D-92]
Flammable Limits (Approximate volume % in air): LEL: 0.9 UEL: 7.0
Autoignition Temperature: N/D
SECTION 6
ACCIDENTAL RELEASE MEASURES

NOTIFICATION PROCEDURES
In the event of a spill or accidental release, notify relevant authorities in accordance with all applicable regulations. US regulations require reporting releases of this material to the environment which exceed the applicable reportable quantity or oil spills which could reach any waterway including intermittent dry creeks. The National Response Center can be reached at (800)424-8802.

PROTECTIVE MEASURES
Avoid contact with spilled material. See Section 5 for fire fighting information. See the Hazard Identification Section for Significant Hazards. See Section 4 for First Aid Advice. See Section 8 for advice on the minimum requirements for personal protective equipment. Additional protective measures may be necessary, depending on the specific circumstances and/or the expert judgment of the emergency responders.

For emergency responders: Respiratory protection: respiratory protection will be necessary only in special cases, e.g., formation of mists. Half-face or full-face respirator with filter(s) for dust/organic vapor or Self Contained Breathing Apparatus (SCBA) can be used depending on the size of spill and potential level of exposure. If the exposure cannot be completely characterized or an oxygen deficient atmosphere is possible or anticipated, SCBA is recommended. Work gloves that are resistant to hydrocarbons are recommended. Gloves made of polyvinyl acetate (PVA) are not water-resistant and are not suitable for emergency use. Chemical goggles are recommended if splashes or contact with eyes is possible. Small spills: normal antistatic work clothes are usually adequate. Large spills: full body suit of chemical resistant, antistatic material is recommended.

SPILL MANAGEMENT

Land Spill: Stop leak if you can do it without risk. Recover by pumping or with suitable absorbent.

Water Spill: Stop leak if you can do it without risk. Confine the spill immediately with booms. Warn other shipping. Remove from the surface by skimming or with suitable absorbents. Seek the advice of a specialist before using dispersants.

Water spill and land spill recommendations are based on the most likely spill scenario for this material; however, geographic conditions, wind, temperature, (and in the case of a water spill) wave and current direction and speed may greatly influence the appropriate action to be taken. For this reason, local experts should be consulted. Note: Local regulations may prescribe or limit action to be taken.

ENVIRONMENTAL PRECAUTIONS
Large Spills: Dike far ahead of liquid spill for later recovery and disposal. Prevent entry into waterways, sewers, basements or confined areas.

SECTION 7
HANDLING AND STORAGE

HANDLING
Prevent small spills and leakage to avoid slip hazard. Material can accumulate static charges which may cause an electrical spark (ignition source). When the material is handled in bulk, an electrical spark could ignite any flammable vapors from liquids or residues that may be present (e.g., during switch-loading operations). Use proper bonding and/or ground procedures. However, bonding and grounds may not eliminate the hazard from static accumulation. Consult local applicable standards for guidance. Additional references include American Petroleum Institute 2003 (Protection Against Ignitions Arising out of Static, Lightning and Stray Currents) or
National Fire Protection Agency 77 (Recommended Practice on Static Electricity) or CENELEC CLC/TR 50404 (Electrostatics - Code of practice for the avoidance of hazards due to static electricity).

Static Accumulator: This material is a static accumulator.

STORAGE
The container choice, for example storage vessel, may effect static accumulation and dissipation. Do not store in open or unlabelled containers. Keep away from incompatible materials.

EXPOSURE CONTROLS / PERSONAL PROTECTION

Exposure limits/standards for materials that can be formed when handling this product: When mists/aerosols can occur the following are recommended: 5 mg/m³ - ACGIH TLV (Inhalable fraction), 5 mg/m³ - OSHA PEL.

NOTE: Limits/standards shown for guidance only. Follow applicable regulations.

ENGINEERING CONTROLS
The level of protection and types of controls necessary will vary depending upon potential exposure conditions. Control measures to consider:
No special requirements under ordinary conditions of use and with adequate ventilation.

PERSONAL PROTECTION

Personal protective equipment selections vary based on potential exposure conditions such as applications, handling practices, concentration and ventilation. Information on the selection of protective equipment for use with this material, as provided below, is based upon intended, normal usage.

Respiratory Protection: If engineering controls do not maintain airborne contaminant concentrations at a level which is adequate to protect worker health, an approved respirator may be appropriate. Respirator selection, use, and maintenance must be in accordance with regulatory requirements, if applicable. Types of respirators to be considered for this material include:
No special requirements under ordinary conditions of use and with adequate ventilation.

For high airborne concentrations, use an approved supplied-air respirator, operated in positive pressure mode. Supplied air respirators with an escape bottle may be appropriate when oxygen levels are inadequate, gas/vapor warning properties are poor, or if air purifying filter capacity/rating may be exceeded.

Hand Protection: Any specific glove information provided is based on published literature and glove manufacturer data. Glove suitability and breakthrough time will differ depending on the specific use conditions. Contact the glove manufacturer for specific advice on glove selection and breakthrough times for your use conditions. Inspect and replace worn or damaged gloves. The types of gloves to be considered for this material include:
No protection is ordinarily required under normal conditions of use.

Eye Protection: If contact is likely, safety glasses with side shields are recommended.
Skin and Body Protection: Any specific clothing information provided is based on published literature or manufacturer data. The types of clothing to be considered for this material include:

No skin protection is ordinarily required under normal conditions of use. In accordance with good industrial hygiene practices, precautions should be taken to avoid skin contact.

Specific Hygiene Measures: Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants. Discard contaminated clothing and footwear that cannot be cleaned. Practice good housekeeping.

ENVIRONMENTAL CONTROLS
Comply with applicable environmental regulations limiting discharge to air, water and soil. Protect the environment by applying appropriate control measures to prevent or limit emissions.

SECTION 9 PHYSICAL AND CHEMICAL PROPERTIES

Note: Physical and chemical properties are provided for safety, health and environmental considerations only and may not fully represent product specifications. Contact the Supplier for additional information.

GENERAL INFORMATION
Physical State: Liquid
Color: Amber
Odor: Characteristic
Odor Threshold: N/D

IMPORTANT HEALTH, SAFETY, AND ENVIRONMENTAL INFORMATION
Relative Density (at 15 °C): 0.888
Flash Point [Method]: >200 °C (392 °F) [ASTM D-92]
Flammable Limits (Approximate volume % in air): LEL: 0.9 UEL: 7.0
Autoignition Temperature: N/D
Boiling Point / Range: >316 °C (600 °F)
Vapor Density (Air = 1): >2 at 101 kPa
Vapor Pressure: <0.013 kPa (0.1 mm Hg) at 20 °C
Evaporation Rate (n-butyl acetate = 1): N/D
pH: N/A
Log Pow (n-Octanol/Water Partition Coefficient): >3.5
Solubility In Water: Negligible
Viscosity: 42 cSt (42 mm2/sec) at 40 °C | 6.3 cSt (6.3 mm2/sec) at 100 °C
Oxidizing Properties: See Hazards Identification Section.

OTHER INFORMATION
Freezing Point: N/D
Melting Point: N/A
Pour Point: -33 °C (-27 °F)
DMSO Extract (mineral oil only), IP-946: <3 %wt

SECTION 10 STABILITY AND REACTIVITY
STABILITY: Material is stable under normal conditions.

CONDITIONS TO AVOID: Excessive heat. High energy sources of ignition.

MATERIALS TO AVOID: Strong oxidizers

HAZARDOUS DECOMPOSITION PRODUCTS: Material does not decompose at ambient temperatures.

HAZARDOUS POLYMERIZATION: Will not occur.

SECTION 11 TOXICOLOGICAL INFORMATION

ACUTE TOXICITY

CHRONIC/OTHER EFFECTS

For the product itself:
Repeated and/or prolonged exposure may cause irritation to the skin, eyes, or respiratory tract.

Contains:
Base oil severely refined: Not carcinogenic in animal studies. Representative material passes IP-346, Modified Ames test, and/or other screening tests. Dermal and Inhalation studies showed minimal effects; lung non-specific infiltration of immune cells, oil deposition and minimal granuloma formation. Not sensitizing in test animals.

Additional information is available by request.

The following ingredients are cited on the lists below: None.

—REGULATORY LISTS SEARCHED—

1 = NTP CARC
2 = NTP SUS
3 = IARC 1
4 = IARC 2A
5 = IARC 2B
6 = OSHA CARC
SECTION 12  ECOLOGICAL INFORMATION

The information given is based on data available for the material, the components of the material, and similar materials.

ECOTOXICITY
Material -- Not expected to be harmful to aquatic organisms.

MOBILITY
Base oil component -- Low solubility and floats and is expected to migrate from water to the land. Expected to partition to sediment and wastewater solids.

PERSISTENCE AND DEGRADABILITY
Biodegradation:
Base oil component -- Expected to be inherently biodegradable

BIOACCUMULATION POTENTIAL
Base oil component -- Has the potential to bioaccumulate, however metabolism or physical properties may reduce the bioconcentration or limit bioavailability.

SECTION 13  DISPOSAL CONSIDERATIONS

Disposal recommendations based on material as supplied. Disposal must be in accordance with current applicable laws and regulations, and material characteristics at time of disposal.

DISPOSAL RECOMMENDATIONS
Product is suitable for burning in an enclosed controlled burner for fuel value or disposal by supervised incineration at very high temperatures to prevent formation of undesirable combustion products. Protect the environment. Dispose of used oil at designated sites. Minimize skin contact. Do not mix used oils with solvents, brake fluids or coolants.

REGULATORY DISPOSAL INFORMATION
RCRA Information: The unused product, in our opinion, is not specifically listed by the EPA as a hazardous waste (40 CFR, Part 261D), nor is it formulated to contain materials which are listed as hazardous wastes. It does not exhibit the hazardous characteristics of ignitability, corrosivity or reactivity and is not formulated with contaminants as determined by the Toxicity Characteristic Leaching Procedure (TCLP). However, used product may be regulated.

Empty Container Warning Empty Container Warning (where applicable): Empty containers may contain residue and can be dangerous. Do not attempt to refill or clean containers without proper instructions. Empty drums should be completely drained and safely stored until appropriately reconditioned or disposed. Empty containers should be taken for recycling, recovery, or disposal through suitably qualified or licensed contractor and in accordance with governmental regulations. DO NOT PRESSURISE, CUT, WELD, BRAZE, SOLDER, DRILL, GRIND, OR EXPOSE SUCH CONTAINERS TO HEAT, FLAME, SPARKS, STATIC ELECTRICITY, OR OTHER SOURCES OF IGNITION. THEY MAY EXPLODE AND CAUSE INJURY OR DEATH.
**SECTION 14**  
**TRANSPORT INFORMATION**

**LAND (DOT):** Not Regulated for Land Transport

**LAND (TDG):** Not Regulated for Land Transport

**SEA (IMDG):** Not Regulated for Sea Transport according to IMDG-Code

GENERATOR'S NON-SPECIAL WASTE CERTIFICATION

F. Additional Waste Stream Information

Profile Number:_________________________________________

Generators Name: D A Hoerr & Sons Inc

Generators SITE Address: 9020 Shade Tree Drive, Peoria, IL 61615
(The location where the waste is generated)

Waste Name: Petroleum impacted soil from a LUST corrective action

The Illinois Environmental Protection Act allows a Generator to certify that their pollution control waste or industrial process waste, is not an Illinois Special Waste (Section 3.45). By completing the following questionnaire, you may certify that the waste stream represented by the Waste Management Profile referenced above is not an Illinois Special Waste as defined in the Act.

Is the waste referenced above any of the following:

1. A Potentially Infectious Medical Waste (PIMW)? □ Yes ☑ No
2. A Hazardous Waste as defined in 40 CFR 261 or in 35 IAC 722.111? □ Yes ☑ No
3. A Liquid Waste (fails the paint filter test as defined in 35 IAC 611.107)? □ Yes ☑ No
4. A regulated PCB waste as defined in 40 CFR 761? □ Yes ☑ No
5. A NESHAP regulated asbestos waste other than waste from renovation or demolition? □ Yes ☑ No
6. A waste resulting from the shredding recyclable metals (auto fluff)? □ Yes ☑ No
7. A delisted Hazardous Waste or Treated Characteristic Hazardous Waste, subject to LDR requirements under 35 IAC 728.107? □ Yes ☑ No

In determining that this waste is not a liquid, I have used knowledge of the processes generating the waste and the attached supporting documentation: □ MSDS ☑ Analytical □ Other (explain below):

In determining that this waste is not RCRA hazardous, I have used knowledge of the processes generating the waste and the attached supporting documentation: □ MSDS □ Analytical ☑ Other (explain below):

Process generating waste is known (LUST corrective action)

8. Is the waste represented by this profile sheet subject to the Illinois Solid Waste Management Act fee? □ Yes ☑ No

By signing below, I certify my waste is NOT an Illinois Special Waste, and that I understand that a person who knowingly and falsely certifies that a waste is not special waste is subject to the penalties set forth in subdivision (b) of subsection (h) of section 44 of the Illinois Environmental Protection Act.

Bartlett, IL  60103

Project ID:  D A Hoerr Nursery
First Environmental File ID:  15-1506
Date Received:  April 03, 2015

Dear Mr. Kyle Webb:

The above referenced project was analyzed as directed on the enclosed chain of custody record.

All Quality Control criteria as outlined in the methods and current IL ELAP/NELAP have been met unless otherwise noted. QA/QC documentation and raw data will remain on file for future reference. Our accreditation number is 100292 and our current certificate is number 003596: effective 03/24/2015 through 03/28/2016.

I thank you for the opportunity to be of service to you and look forward to working with you again in the future. Should you have any questions regarding any of the enclosed analytical data or need additional information, please contact me at (630) 778-1200.

Sincerely,

[Signature]

MATERIAL SAFETY DATA SHEET

Trade Name: CITGO Unleaded Gasoline

Commodity Code: 04-001

Synonyms: Benzin, Motor Gasoline, Petrol

CAS No.: Mixture
(Refer to Section I)

Citgo Index No. (CIN): 0083

Technical Contact: (918) 561-5165
Medical Emergency: (318) 491-6215

MATERIAL HAZARD EVALUATION

Health: Harmful or fatal if swallowed. Vapors harmful.

Precautionary Statement: Extremely flammable liquid. Do not siphon by mouth. If swallowed, do not induce vomiting - call physician immediately.

II. PHYSICAL DATA

Physical Hazard Classification (Per 29 CFR Part 1910.1200)

- Combustible
- Oxidizer
- Compressed Gas
-Pyrophoric
- Explosive
-Reactivity
- Flammable
-Stable
- Organic Peroxide
-Unstable

Boiling Point, 760 mmHg, °C(°F): 33-43 (90-110)
Melting Point, °C(°F): NA
Vapor Pressure, mmHg (25°C): 510-760

Specific Gravity
(H₂O-1): 0.74
Solubility in H₂O, % By Wt.: Negligible

Vapor Density (Air=1): 3-4
Evaporation Rate
(Butyl Acetate=1): <1

% Volatiles By Vol.: ~100
pH of Undiluted Product: ND

Appearance and Odor: Light yellow clear liquid, gasoline odor.

III. FIRE AND EXPLOSION DATA

Flash Point, COC, °C(°F): -43(-45)
NFFPA®
Flash Point, FM, °C(°F): ND
Health: 2
Fire Point, COC, °C(°F): ND
Flammability: 3
Reactivity: 0

Flammable Limits in Air, % Vol.:
Lower: 1.4
Upper: 7.6

Extinguishing Media: CO₂, dry chemical, foam, water fog.

Special Fire Fighting Procedure: Wear self-contained breathing apparatus when in a confined area.

Unusual Fire or Explosion Hazard: Material is highly volatile and emits vapors which may be ignited by other ignition sources.

*Citgo assignment based on our evaluation per NFFPA guidelines. Hazard Rating least-0; slight-1; moderate-2; high-3; extreme-4.

ND = No Data
NA = Not Applicable
IV. REACTIVITY DATA

Stability: □ Stable □ Unstable

Conditions Contributing to Instability: High Temperature.

Incompatibility: Strong oxidants.

Hazardous Decomposition Products (thermal, unless otherwise specified): CO, CO₂

Conditions Contributing to Hazardous Polymerization: None.

V. SPILL OR LEAK PROCEDURES

Procedures if Material is spilled:

Remove sources of ignition, ventilate area, contain spill, absorb small amounts with absorbent material. Report spills as required to appropriate authorities.

Waste Disposal:

It is the responsibility of the user to determine if the material is a hazardous waste at the time of disposal.

Check before disposing to be sure you are in compliance with all applicable laws and regulations.

Chemtrec/RCRA Emergency Number: (800) 424-9346

Protective measures during repair and maintenance of contaminated equipment:

Refer to Section VII - Special Protection Information. Provide sufficient ventilation, eliminate all ignition sources. Wash exposed skin thoroughly with soap and water. Remove soiled clothing. Use polymer gloves if extended, direct contact is expected.
VI. HEALTH HAZARD DATA

Health Hazard Classification (Per 29 CFR Part 1910.1200)

- Carcinogen
- Animal Carcinogen [X]
- Suspect Carcinogen
- Mutagen
- Highly Toxic
- Toxic

Corrosive
Irritant
Sensitizer
Teratogen

Target Organ: hematopoietic system

Toxicity Summary: Moderately toxic; 1 oz. or more is probably lethal oral dose for 150 lb. human. Methanol can cause blindness.

Acute Exposure Symptoms

Inhalation: Moderate risk of vapor intoxication. Major risk is enclosed spaces with poor ventilation. Euphoria, lung irritation and edema, headache, dizziness, drowsiness, convulsions, coma, cyanosis, generalized depression.

Dermal Contact: Defatting with drying and cracking - can lead to dermatitis and secondary infection.

Absorption: If large areas of the body are affected, symptoms of inhalation may be produced. Methanol can be absorbed through the skin.

Eye Contact: Irritant

Ingestion: Burning of mouth and upper GI tract, vomiting and diarrhea. Less than 1 oz. with retention: general depression, sedation, respiratory depression, coma. Effects are usually transient.

Chronic Exposure:

Skin: drying and cracking (dermatitis)

Inhalation: Benzene has been classified as a leukemogen, and may produce anemia, leukemia from repeated or prolonged exposure to high concentrations. The American Petroleum Institute sponsored chronic inhalation studies of unleaded gasoline vapors which indicate that unleaded gasoline is carcinogenic to laboratory animals.

Other Special Effects: None.

First Aid and Emergency Procedures for Acute Effect

Inhalation: Remove to fresh air. Respiratory support, if necessary. Seek medical aid.

Dermal: Wash with soap and water. Do not wear heavily contaminated clothing before cleaning.

Eyes: Flush with large volumes of water. Seek medical aid.

Ingestion: Do not induce vomiting. Seek medical aid.

Notes to Physician: Pulmonary aspiration hazard if swallowed and vomiting occurs. High aspiration risk, careful gastric lavage with tight fitting or cuffed endotracheal tube. Aspiration may cause chemical pneumonitis or lipid pneumonia. Contains methanol. SUS viscosity at 100°F = <40.

ND = No Data
NA = Not Applicable

IAS/04-001
VII. SPECIAL PROTECTION INFORMATION

Ventilation Requirements: Use in well ventilated areas. In confined spaces mechanical ventilation may be required to keep levels of certain components below mandated standards. Responsible individuals should evaluate air concentrations of specific regulated chemicals.

TLV:
- TWA (Time Weighted Average): 300 ppm (900 mg/m³);
- STEL (Short Term Exposure): 500 ppm (1500 mg/m³) ACGIH-1985-86.

Specific Personal Protective Equipment:
- Respiratory: If high vapors are expected, use respirator approved for organic vapors.
- Eyes: Safety goggles, or chemical splash goggles if splashing is anticipated.
- Dermal: Oil impervious gloves such as Buna-N, Neoprene, or Poly-D if frequent or prolonged contact is expected.
- Other Clothing or Equipment: Wear body-covering work clothes to avoid prolonged or repeated exposure. Launder soiled work clothes before reuse. Treat as leukemogenic material.

VIII. TRANSPORTATION AND SPECIAL PRECAUTIONS

Storage: Keep container tightly closed and away from heat and flame.
Do not store with strong oxidizers; keep container tightly closed.

DOT Information:
- DOT/UN Shipping Name: Gasoline.
- DOT Class: Flammable liquid.
- UN Identification Number: UN 1203.
- Placards: Flammable liquid.

Caution: Empty containers may contain product residue which could include flammable or explosive vapors.

Consult appropriate Federal, State and Local authorities before reusing, reconditioning, reclaiming, recycling or disposing of empty containers and/or waste residues of this product.

All statements, information, and data provided in this material safety data sheet are believed to be accurate and reliable, but are presented without guarantee, warranty, or responsibility of any kind, expressed or implied, on our part. Users should make their own investigations to determine the suitability of the information or products for their particular purpose. Nothing contained herein is intended as permission, inducement or recommendation to violate any laws or to practice any invention covered by existing patents.

G. GENERATOR CERTIFICATION (PLEASE READ AND CERTIFY BY SIGNATURE)
By signing this EZ Profile™ form, I hereby certify that all information submitted in this and all attached documents is true and accurate descriptions of the material, and that all relevant information necessary for proper material characterization and to identify known and suspected hazards has been provided. Any analytical data attached was derived from a sample that is representative as defined in 40 CFR 261.3 and by using an equivalent method. If changes occur in the character of the material (i.e., changes in the process or new analytical data) will be identified by the Generator and be submitted to Waste Management prior to providing the material to Waste Management.

If I am an agent signing on behalf of the Generator, I have confirmed with the Generator that information contained in this Profile is accurate and complete.

<tr>
<td>10.</td>
</tr>
</tbody>
</table>

If more space is needed, please attach additional pages.

D. REGULATORY INFORMATION

Only questions with a “Yes” response in Section D on the EZ Profile™ form (page 1) need to be answered here.

1. EPA Hazardous Waste
   a. Please list all USEPA listed and characteristic waste code numbers:

   b. Is the material subject to the Alternative Debris standards (40 CFR 268.45)?
      - Yes
      - No

   c. Is the material subject to the Alternative Soil standards (40 CFR 268.49)? → If Yes, complete question 4.
      - Yes
      - No

   d. Is the material exempt from Subpart CC Controls (40 CFR 264.1083 and 265.1084)?
      → If Yes, please select one of the following:
      - Waste has been determined to be LDR exempt (265.1083(c)(4) and 265.1084(c)(4)) based on the fact that it meets all applicable organic treatment standards (including UHCs for D-coded characteristic wastes) or a Specified Technology has been utilized.
      - Waste does not qualify for a LDR exemption, but the average VOC at the point of origin is <500 ppmw and this determination was based on analytical testing (upload copy of analysis) or generator knowledge.

2. State Hazardous Waste → Please list all state waste codes:

3. Excluded Waste → Please select which of the following categories apply to your material:
   - Delisted Hazardous Waste
   - Excluded Waste under 40 CFR 261.4 → Specify Exclusion:
   - Treated Hazardous Waste Debris
   - Treated Characteristic Hazardous Waste → If checked, complete question 4.

4. Underlying Hazardous Constituents → Please list all Underlying Hazardous Constituents:

5. Benzene NESHAP → Please include benzene concentration and percent water/moisture in chemical composition.
   a. Are you a TSDF? → If yes, please complete Benzene NESHAP questionnaire. If not, continue.
   - Yes
   - No
   b. What is your facility’s current total annual benzene quantity in Megagrams?
   - <1 Mg
   - 1–9.99 Mg
   - ≥10 Mg
   - Yes
   - No

6. 40 CFR 63 GGGGG → Does the material contain <500 ppm VOHAPs at the point of determination?
   - Yes
   - No

7. CERCLA or State-Mandated clean up → Please submit the Record of Decision or other documentation to assist others in the evaluation for proper disposal.

8. NRC or state regulated radioactive or NORM Waste → Please identify isotopes and pCVg:

THINK GREEN!

### D. REGULATORY INFORMATION

1. EPA Hazardous Waste
   - Please list all USEPA listed and characteristic waste code numbers ( Continued from page 2):

---
Profile Addendum: State of Illinois
GENERATOR'S NON-SPECIAL WASTE CERTIFICATION

I. Additional Waste Stream Information

Profile Number: 

Generators Name: **Praxair, INC**

Generators SITE Address: **1225 S. FRAT ST, PEKIN, IL, 61554**
(The location where the waste is generated)

Waste Name: **Sulfate Treat**

The Illinois Environmental Protection Act allows a Generator to certify that their pollution control waste or industrial process waste, is not an Illinois Special Waste (Section 3.45). By completing the following questionnaire, you may certify that the waste stream represented by the Waste Management Profile referenced above is not an Illinois Special Waste as defined in the Act.

Is the waste referenced above any of the following:

1. A Potentially Infectious Medical Waste (PIMW)? □ Yes □ No
2. A Hazardous Waste as defined in 40 CFR 261 or in 35 IAC 722.111? □ Yes □ No
3. A Liquid Waste (fails the paint filter test as defined in 35 IAC 811.107)? □ Yes □ No
4. A regulated PCB waste as defined in 40 CFR 761? □ Yes □ No
5. A NESHAP regulated asbestos waste other than waste from renovation or demolition? □ Yes □ No
6. A waste resulting from the shredding recyclable metals (auto fluff)? □ Yes □ No
7. A delisted Hazardous Waste or Treated Characteristic Hazardous Waste, subject to LDR requirements under 35 IAC 728.107? □ Yes □ No

In determining that this waste is not a liquid, I have used knowledge of the processes generating the waste and the attached supporting documentation: □ Analytical □ Other (explain below):

In determining that this waste is not RCRA hazardous, I have used knowledge of the processes generating the waste and the attached supporting documentation: □ Analytical □ Other (explain below):

8. Is the waste represented by this profile sheet subject to the Illinois Solid Waste Management Act fee? □ Yes □ No

By signing below, I certify my waste is **NOT** an Illinois Special Waste, and that I understand that a person who knowingly and falsely certifies that a waste is not special waste is subject to the penalties set forth in subdivision (6) of subsection (h) of section 44 of the Illinois Environmental Protection Act.

### MEDICAL CONDITIONS AGGRAVATED BY EXPOSURE

- Inhaling respirable dust may aggravate existing respiratory system disease(s) and/or dysfunctions.
- Exposure to dust may aggravate existing skin and/or eye conditions.

### ACUTE TOXICITY

- **Primary route(s) of exposure:** □ Inhalation □ Ingestion
- Exposure to dust may irritate respiratory system, eyes, and skin.

### FIRST AID

- **Dust in eyes:** Flush eyes with running water for 15 minutes. Contact a physician if irritation persists.
- **Dust on skin:** Wash with soap and water. Contact a physician if a previously existing irritation is aggravated.
- **Dust inhalation:** Remove to fresh air.
- Dust in throat and nasal passages should clear spontaneously. Contact a physician if irritation persists.
CHRONIC TOXICITY

Chronic exposure to respirable dust in excess of appropriate TLVs has caused pneumoconiosis (Dusty Lung). Overexposure may produce symptoms known as metal fume fever; an acute, self-limiting condition without recognized complications. Symptoms of metal fume fever include: chills, fever, muscle pain, nausea and vomiting. Like any finely divided particulate matter, dust may cause mechanical irritation to skin and eyes.

To the best of our knowledge this product is not listed as a carcinogen on the NTP, IARC, or OSHA lists of carcinogens or contains no reportable levels of listed substances, which the state of California has found to cause cancer, birth defects, or other reproductive effects.

VII - PERSONAL PROTECTION AND CONTROLS

RESPIRATORY PROTECTION

NIOSH-MSHA approved dust respirators for conditions where dust levels exceed or are likely to exceed appropriate exposure limits. Respirator use must comply with applicable MSHA or OSHA standards, which include provisions for a user training program, respirator repair and cleaning, respirator fit testing, and other requirements.

VENTILATION

Local exhaust or general ventilation adequate to maintain exposures below appropriate TLVs.

SKIN PROTECTION

See "Hygiene" section below. Not readily absorbed through skin but may cause irritation.

EYE PROTECTION

Safety glasses with side shields should be worn as minimum protection. Dust goggles should be worn when excessively (visible) dusty conditions are present or are anticipated.

HYGIENE

Wash dust-exposed skin with soap and water. Wash work clothes after each use.

OTHER CONTROL MEASURES

Use good housekeeping practices to keep dust to a minimum. Dust levels in excess of appropriate TLVs should be reduced by all feasible engineering controls, including (but not limited to) wet suppression, ventilation, process enclosure, and enclosed employee work stations.

VIII - STORAGE AND HANDLING PRECAUTIONS

Product should be stored at ambient temperature in closed containers avoiding exposure to excessive moisture. Respirable dust may be generated during processing, handling, and storage. The controls identified in Section VII of the MSDS should be applied as appropriate.

IX - SPILL LEAK AND DISPOSAL PRACTICES

STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED

Spilled materials, where dust can be generated, may overexpose cleanup personnel to respirable dust. Wetting of spilled material and/or use of respiratory protective equipment may be necessary.

WASTE DISPOSAL METHOD

Pickup and reuse clean materials or return for recycle. Dispose of waste materials only in accordance with applicable federal, state, and local laws and regulations.

X - TRANSPORTATION

DOT HAZARD CLASSIFICATION

None - Ship as Class 50

WHMIS CLASSIFICATION

Not controlled.

DEL - Listed

PLACARD REQUIRED

None

LABEL REQUIRED

Label as required by applicable state and local regulations.

XI - REGULATORY INFORMATION

DISPOSAL: This product is not hazardous waste per 40 CFR 261.24 or 261.3. However consult with the state environmental regulatory agency before disposing of this material, as state regulations may be stricter than federal regulations. Zinc oxide contained in this product is not considered environmentally hazardous outside of the EU.

SPILL REPORTING

This product is neither a CERCLA hazardous substance, per 40 CFR 302.4. It contains nothing on the list of hazardous substances under the Clean Water Act (40 CFR 116 and 40 CFR 117) as zinc oxide or iron oxide, but zinc compounds in general are considered toxic to aquatic life. Zinc oxide or iron oxide are not included on the list of Extremely Hazardous Substances under SARA, 40 CFR 355 Appendix A. Thus, there are no Federal reporting requirements in the event of release of this material as containing zinc oxide or iron oxide. Depending upon the final level of zinc in spill material, this product may not be considered non-hazardous waste in the State of California by TTLC or STLC determination.

SARA REPORTING: This product is not subject to the reporting requirements of Section 304 of SARA, since it contains nothing on the list of Extremely Hazardous Substances. This product may be subject to the reporting requirements of Section 313 of SARA as zinc compounds but, zinc oxide contained in this product is not specifically listed.

CALIFORNIA PROPOSITION 65 - To the best of our knowledge this product contains no reportable levels of listed substances, which the state of California has found to cause cancer, birth defects, or other reproductive effects.

CARCINOGENIC - To the best of our knowledge this product is not listed as a carcinogen on the NTP, IARC, or OSHA lists of carcinogens.

DATE OF PREPARATION: February 11, 2015

NOTICE: HydroCat Industries believes that the information contained on this Material Safety Data Sheet is accurate. The suggested procedures are based on experience as of the date of publication. They are not necessarily all-inclusive nor fully adequate in every circumstance. Also, the suggestions should not be confused with nor followed in notation of applicable laws, regulations, rules or insurance requirements.

REQUEST FOR DISCUSSION

To: Peoria City/County Landfill Committee Members

From: Mark Williams and Josh Gabehart, P.E., Foth

AGENDA DATE REQUESTED: May 20, 2015

ACTION REQUESTED: Receive and File Landfill #1 – 1st Quarter 2015 Groundwater Update

BACKGROUND: This memo serves as the quarterly update of the current status of groundwater compliance for Landfill #1. Below is brief description of the groundwater sampling process.

As required in the landfill permit, groundwater monitoring wells surrounding the landfill are routinely sampled to detect signs of potential discharge, release, or impact to the groundwater within the facility boundary. The groundwater monitoring wells are sampled on a semi-annual basis (2nd and 4th quarters). The samples are analyzed for the parameters listed in the permit and detections are compared to their respective Applicable Groundwater Quality Standard (AGQS). This is considered detection monitoring or routine sampling.

If a groundwater monitoring well has a detection of a parameter above its AGQS value, it is considered an observed increase and requires re-sampling. That groundwater monitoring well is then re-sampled the following quarter for that specific parameter. If the re-sample result returns below the AGQS value, the groundwater monitoring well returns to detection monitoring. If the result returns above the AGQS, it is considered a confirmed increase and the groundwater monitoring well then moves into assessment monitoring.

Upon receiving a confirmed increase, the IEPA is notified that the groundwater monitoring well has a confirmed increase for a particular parameter and an assessment plan is proposed. Assessment monitoring typically consists of sampling the groundwater monitoring well on a quarterly basis (rather than semi-annually), but could also include installing nearby temporary monitoring wells or other means to investigate the higher concentrations and to determine the cause of the increase and delineate the area of concern. The length of time a groundwater monitoring well is in assessment monitoring can vary greatly. Depending on the detection level of the parameter at the conclusion of the assessment monitoring period, a report is submitted to the IEPA for approval which either proposes the groundwater monitoring well return to detection monitoring, a new AGQS value for that parameter is proposed, or corrective action is proposed for the groundwater monitoring well.

Corrective action for a groundwater monitoring well, with IEPA approval and direction, can involve a variety of actions such as continued well monitoring, groundwater extraction, gas/leachate system operations/improvements, increased monitoring well network, etc. The length of time a groundwater monitoring well is in corrective action can also vary greatly. Upon the conclusion of the corrective action period and the parameter of concern has returned to an acceptable level, a report is submitted to IEPA for approval to propose the well return to detection monitoring.

SUMMARY: Quarterly Monitoring results are summarized:

1) **Observed Increases** Three (3) monitoring wells had observed increases during the 4th quarter 2014 groundwater sampling event. Dissolved and total nitrate at monitoring well G17S and
dissolved chromium at monitoring wells G20S and G22S. As required by the permit, these observed increases were resampled during the 1st quarter 2015 sampling event. All concentrations returned to levels below permit AGQS values, no further compliance action is required for these observed increases.

Also occurring during the 1st quarter sampling event, there were reported concentrations above permit AGQS values for the parameters dissolved arsenic at well G04S, and dissolved lead and dissolved chromium at monitoring wells G04S and R10S. The IEPA was notified of the increases and resampling will occur during the second quarter as part of ongoing monitoring and corrective action already being conducted at these two wells.

2) Corrective Action Underway. Assessment monitoring continues at monitoring wells G02S, G04S, and R10S. Volatile organic compounds (VOCs) were not detected at monitoring wells G02S or G04S in the 1st quarter 2015 sampling event but Cis 1,2-dichloroethene was detected at well R10S during that event. This parameter was the only VOC detected and was at a concentration of 0.1ppb above the permit AGQS value.

As mentioned above the dissolved metal parameters arsenic (G04S), chromium and lead (G04S, R10S) had concentrations above permit AGQS values. The concentrations of these parameters will be evaluated for trends at G04S, R10S and nearby monitoring wells after completion of the 2nd quarter sampling event. As a condition of corrective action additional analytical testing is already required during the 2nd quarter event for these three (3) monitoring wells. The additional analytical testing requirements include inorganic and organic parameters from 35 IAC 620.410 and 40 CFR Appendix II Parameter lists.

3) Assessment Monitoring at Groundwater Monitoring Wells R15S and G23S for the dissolved metal chromium. Assessment monitoring for dissolved chromium at wells G15S and G23S is underway. The assessment plan was approved in Permit Modification No. 86 dated February 5, 2015. The dissolved chromium concentration at R15S and G23S remained above permit AGQS values during the 1st quarter event. An assessment summary report of the findings is due to the IEPA on February 15, 2016.

FINANCIAL IMPACT: The Committee is responsible for assessment monitoring costs that arise based on confirmed increases.

As a reminder, by contract with the Committee, Waste Management is responsible for routine groundwater sampling and re-samples at Landfill No. 1. However, assessment monitoring that arises based on increases confirmed by re-sampling are the responsibility of the Committee. This monitoring is generally completed by Waste Management’s contractor in order to reduce costs of additional trips and field personnel.
REQUEST FOR DISCUSSION

To: Peoria City/County Landfill Committee Members
From: Joshua Gabehart, P.E., Foth

AGENDA DATE REQUESTED: May 20, 2015,

ACTION REQUESTED: Receive and File Monthly Report

BACKGROUND: The following report is provided for engineering items that have occurred since the last scheduled Committee meeting:

Financial Information

Attached is a spreadsheet showing the engineering services provided from July 1, 2014 through April 30, 2015. The total amount billed to date is $297,752.63. These costs include construction observation, pump and other related material purchases, legal support services and ongoing operational costs. Legal support services were originally budgeted at $5,000 and current billing is at $16,652.27 due to request for additional services by the Committee associated with RTC litigation, which includes file search, review of historic documentation, and consultation with the Committee’s Legal Counsel.

During the month of April, the IEPA Bureau of Air requested over 30 points of additional information for the Peoria City County Landfill Site Clean Air Act Title V. The request required response by May 15, 2015 and the information request is in response to a submittal from December of 2010 to the IEPA. The response was completed by Waste Management but Landfill 1 information and submittal review was provided by Foth.

Updates Regarding Compliance Activities, Measures and Progress

There were two (2) unscheduled shutdowns during the month of April. The first occurred on April 2nd for 5 hours and 16 minutes and was caused by a power outage. Power was restored and the flare resumed operation. The second shutdown was on April 9th and lasted only 1 minute. The cause of the shutdown was unknown and the flare automatically resumed operation immediately following the shutdown.

Overall the months of March and April have been highly productive with leachate extraction and with GCCS improvements. Since January, 60,700 gallons of leachate/condensate have been removed from Landfill No.1 and transported to the GPSD for treatment. At this point in 2014, 9,000 gallons had been transported to the GPSD for treatment by the end of April.

Through proper maintenance, condensate removal and monitoring of the GCCS, only one gas well (R-5) exhibited positive pressure in March, which has decreased from two gas wells in February and 3 gas wells in January.

FINANCIAL IMPACT: The time period of the budget for engineering services is currently 83% complete. Including the additional services required the GCCS project, legal support, unplanned system repairs, and IEPA information requests; the current expenditures are 101% of the approved engineering budget.

**Month End Comments:**

- Operations: included $5,988 in legal assistance services not in original budget or scope and flare. Included this month under phase 8 are expanded efforts relating to condensate sump and the above ground leachate pump purchase, solar panel purchases, Sanitary liquid removal to improve gas collection. Note LEL% that required gas field manipulation and increased leachate hauling included in phase 9.
- Equipment: included construction observation, solar panel purchases, Sanitary liquid removal to improve gas collection. Note LEL% that required gas field manipulation and increased leachate hauling included in phase 9.

**Operational Comments:**

REQUEST FOR DISCUSSION

To: Peoria City/County Landfill Committee Members

From: Mike Rogers, Public Works Director

AGENDA DATE REQUESTED: May 20, 2015

ACTION REQUESTED: RECEIVE AND FILE FINANCIAL REPORTS

BACKGROUND: Attached is the revenue and expense financial report for financial transactions occurring in April 2015. The report shows the prior year’s (fy2014) actual financial performance, the projected 2015 monthly budget and the monthly actual for the reporting period. The shaded columns depicts the year-to-date 2014 and 2015 total, allowing a quick comparison of past and current financial performance. The attached chart displays the financial information in bar graph form.

The actual revenue for the month of April is in excess of the expense and reflect a favorable balance of $12,842.53. The year-to-date January through April revenue over expense balance of $19,736.27 is also favorable, compared to last year unfavorable balance of negative $11,766.15 during the same time period.

DEPARTMENT OF THE ARMY
CORPS OF ENGINEERS, ROCK ISLAND DISTRICT
P.O. BOX 2004 CLOCK TOWER BUILDING
ROCK ISLAND, ILLINOIS 61204-2004

April 27, 2015

Operations Division

SUBJECT: CEMVR-OD-P-2014-1499

Mr. Christopher Coulter
Peoria City/County Landfill, Inc.
4700 North Sterling Avenue
Peoria, Illinois 61615

Dear Mr. Coulter:

We are enclosing a Department of the Army (DA) provisional permit (in duplicate) which, when issued, will authorize the mechanical clearing and filling of 1.62 acres of emergent/forested wetland for the purpose of expanding an existing landfill site in Section 23, Township 9 North, Range 6 East, Peoria County, Illinois.

At this time, please carefully review the enclosed permit, and also refer to the enclosed Notification of Applicant Appeal Process (NAP). The decision regarding this action is based on information found in the administrative record, which documents the District’s decision-making process, the basis for the decision, and the final decision.

Please note that, by Federal law, a DA permit cannot be issued until a State Section 401 Water Quality Certification has been issued or has been waived. As of this date, the Illinois Environmental Protection Agency (IEPA) has not issued water quality certification for your project. You may wish to contact the IEPA to determine the status of the water quality certification for your project. They may be contacted by telephone at 217-782-3362 or by mail at the address at the end of this letter.

Therefore, this provisional permit is NOT VALID and you are not authorized to commence work under this permit until:

- You have received the state certification or the certification is considered waived by this District, and
- You and this District have appropriately signed the permit.

Conditions of the State water quality certification, if issued, will become conditions to the final DA permit. We will notify you if the State’s action on the required certification or concurrence precludes validation of the provisional permit in its current form, requiring further action. Substantial changes may require a modification of the current provisional permit or possibly re-evaluation, including issuing a new public notice.
When you receive the Section 401 water quality certification or we notify you that we consider the certification waived, you may accept this initial proffered provisional permit by signing and dating both copies of the permit on page 8 and return both copies of the permit with a check for $100.00. Please make the check payable to the Rock Island District, Corps of Engineers at the following address:

District Engineer  
US Army Corps of Engineers, Rock Island District  
ATTN: Regulatory Branch (OD-PE)  
Clock Tower Building  
Post Office Box 2004  
Rock Island, Illinois 61204-2004

The permit will become effective when signed by an authorized representative of this office. We will provide a copy of the signed permit to you at that time.

If you do not accept the terms and conditions of this initial proffered provisional permit, you may decline and request that this initial proffered permit be modified by following procedures outlined in Section I.A. of the attached Notification of Appeals Process. If you decline, however, you are not authorized to commence work until you receive the appropriate Department of the Army authorization. Your request must be received by the Rock Island District Engineer at the above address by June 29, 2015.

Our office has completed a Preliminary Jurisdictional Determination concerning your project area. A copy of our jurisdictional determination is enclosed. A Preliminary Jurisdictional Determination is not appealable, and it is applicable only to the permit program administered by the Corps of Engineers. Please review, sign, date, and return the form to our office.

Thank you for your cooperation. Should you have any questions, please contact me by letter, or telephone me at (309) 794-5674.

Sincerely,

[Signature]

Gene W. Walsh  
Project Manager  
Illinois/Missouri Section  
Regulatory Branch

Enclosures
DEPARTMENT OF THE ARMY PERMIT

Permit Number: CEMVR-OD-P-2014-1499
Permittee: Peoria City/County Landfill, Inc.
4700 North Sterling Avenue
Peoria, Illinois 61615

Section: 404
POC: Mr. Christopher Coulter
Tel: 309-688-0760

Effective Date:
Expiration Date: December 31, 2021
Issuing Office: U.S. Army Corps of Engineers, Rock Island District
Clock Tower Building - P.O. Box 2004
Rock Island, Illinois 61204-2004

NOTE: The term "you" and its derivatives, as used in this permit, means the permittee or any future transferee. The term "this office" refers to the appropriate district or division office of the Corps of Engineers having jurisdiction over the permitted activity or the appropriate official of that office acting under the authority of the commanding officer.

You are authorized to perform work in accordance with the terms and conditions specified below.

Project Description: The permittee will fill 1.62 acres of emergent/forested wetland in association with the expansion of the Peoria City/County Landfill. The landfill expansion project will provide 10.1 million tons of waste disposal capacity within an approximate 78.2-acre expansion area at the existing 321-acre landfill site.

Wetland Mitigation Plan: The permittee will construct, maintain, and monitor a 10.7-acre wetland mitigation site at Vicary Bottoms Dog Park within the Kickapoo Creek watershed. After the wetland complex has been successfully established and monitored for a minimum period of 5 years, the long term maintenance and management of the mitigation site will be transferred to the Peoria Park District which owns and operates the dog park. Compensatory mitigation shall be in excess of a 2:1 replacement ratio. The wetland plan involves the establishment of 1.29 acres of emergent wetland, 2.03 acres of wet prairie, 0.1 acres of forested wetland, 0.43 acres of deep water habitat, and 2.5 acres of upland prairie buffer. An additional 3.3 acres of existing wooded riparian corridor shall be preserved.

Project Location:

- **Wetland Mitigation Site.** Section 1, Township 8 North, Range 7 East; near Pottstown, Peoria County, Illinois. Datum NAD-83. UTM Zone 16. Northing 4510020.52, Easting 275734.92. Lat: 40.7105871. Long: -89.654876. (Peoria West, IL USGS topo map)

In accordance with the plans and drawings attached hereto which are incorporated in and made a part of this permit.

Drawings
- CEMVR-OD-P-2014-1499
  - Sheet 1 of 4, Regional Map
  - Sheet 2 of 4, Landfill Expansion Area
  - Sheet 3 of 4, Location of Wetland Mitigation Site
  - Sheet 4 of 4, Wetland Mitigation Site Plan
Permit Conditions:

General Conditions:

1. The time limit for completing the work authorized ends on the date specified on page 1. If you find that you need more time to complete the authorized activity, submit your request for a time extension to this office for consideration at least one month before that date is reached.

2. You must maintain the activity authorized by this permit in good condition and in conformance with the terms and conditions of this permit. You are not relieved of this requirement if you abandon the permitted activity, although you may make a good faith transfer to a third party, in compliance with General Condition 4 below. Should you wish to cease to maintain the authorized activity or should you desire to abandon it without a good faith transfer, you must obtain a modification of this permit from this office, which may require restoration of the area.

3. If you discover any previously unknown historic or archaeological remains while accomplishing the activity authorized by this permit, you must immediately notify this office of what you have found. We will initiate the Federal and state coordination required to determine if the remains warrant a recovery effort or if the site is eligible for listing in the National Register of Historic Places.

4. If you sell the property associated with this permit, you must obtain the signature of the new owner in the space provided and forward a copy of the permit to this office to validate the transfer of this authorization. The permittee is required to provide 60-day advance notification to the district engineer before any action is taken to void or modify the instrument, management plan, or long-term protection mechanism, including transfer of title to, or establishment of any other legal claims over, the wetland enhancement site.

5. If a conditioned water quality certification has been issued for your project, you must comply with the conditions specified in the certification as special conditions to this permit. For your convenience, a copy of the certification is attached if it contains such conditions.

6. You must allow representatives from this office to inspect the authorized activity at any time deemed necessary to ensure that it is being or has been accomplished in accordance with the terms and conditions of your permit.

Special Conditions:

1. That the permittee understands and agrees that this permit is not valid until the Illinois Environmental Protection Agency either issues or waives water quality certification. (See also General Condition 5 above.) Any conditions listed in the water quality certification from the Illinois Environmental Protection Agency will be a part of this permit (once issued).

2. The technical specifications listed in the document entitled Vicary Bottoms Wetland Mitigation Plan dated September 2014 should be made part of this permit and may be used as a reference for various procedures for the mitigation plan except as superseded as discussed below.

3. In order to protect water quality, if excavation and construction are completed outside an optimal seeding period, temporary erosion control protection shall be implemented immediately upon completion of excavation and construction and shall be maintained until such time as wetland plantings can be completed during an optimal period. The permanent wetland plantings shall then be completed during the next optimal seeding period.
4. Mitigation work shall begin concurrent with the initiation of project construction. The mitigation work shall be completed within one year of the initiation of project construction on the site.

5. The permittee shall notify this office in writing upon the completion of the wetland mitigation plan. The permittee shall be responsible to perform any corrective actions deemed necessary by this district to insure wetland success.

6. Drawings/photographs/location maps of the constructed wetland mitigation area will be submitted to the District Engineer (DE) within 30 days of completing construction activities. The drawings must include a list of species planted, the location of all plantings, cross-sectional drawings of the planting schemes and the boundaries of the enhancement activities;

7. Wetland monitoring reports must be submitted on an annual basis for a period of five years:

   a. The reports must include photos taken at established photo points, a list of dominant plant species, the average percent cover for each dominant species, the success rate of plantings, an evaluation of the upper 3 feet of the soil profile, an assessment of wetland hydrology (defined as inundation of 2 feet or less and/or saturation within 12 inches of the ground surface for at least 14 consecutive days of the average growing season), and details of any corrective actions taken or needed;

   b. The monitoring reports will be submitted to the Corps of Engineers, Rock Island District Office by December 31 of each year;

   c. Monitoring must begin the first full growing season after the grading and planting of the wetland area and must occur during the growing season;

   d. Annual monitoring reports must follow a 10-page maximum report format for assessing the wetland mitigation area, as follows:

    i. Project Overview (1 page)

       (1) Corps Permit Number
       (2) Name and contact information of permittee and consultant
       (3) Name of party responsible for conducting the monitoring and the date(s) the inspection was conducted.
       (4) A brief paragraph describing the purpose of the approved project, acreage and type of aquatic resources impacted, and mitigation acreage and type of aquatic resources authorized to compensate for the aquatic impacts.
       (5) Written description on the location and any identifiable landmarks of the compensatory mitigation project including information to locate the site perimeter(s) and coordinates of the mitigation site (expressed as latitudes, longitudes, UTM, state plane coordinate system, etc.).
       (6) Directions to the mitigation site.
       (7) Dates mitigation/restoration commenced and/or completed.
       (8) A brief statement on whether the performance standards are being met.
       (9) Dates of any recent corrective or maintenance activities conducted since submission of any previous reports.
       (10) Specific recommendations for any additional corrective or remedial actions.
ii. Requirements (1 page)

List the monitoring requirements and performance standards, as specified in the approved plan and special conditions of the permit, and evaluate whether the site is successfully achieving the approved performance standards or trending towards success. A table is a recommended option for comparing the performance standards to the conditions and status of the developing wetland mitigation site.

iii. Summary Data (maximum of 4 pages)

Summary data should be provided to substantiate the success and/or potential challenges associated with the wetland mitigation project. Photo documentation may be provided to support the findings and recommendations referenced in the monitoring report and to assist the project manager (PM) in assessing whether the project is meeting the applicable performance standards for that monitoring period. Submitted photos should be formatted to print on a standard 8 1/2 x 11” piece of paper, dated, and clearly labeled with the direction from which the photo was taken. The photo location points should also be identified on the appropriate maps.

iv. Maps and Plans (maximum of 3 pages)

Maps should be provided to show the location of the site relative to other landscape features, habitat types, locations of photographic reference points, transects, sampling data points, and/or other features pertinent to the wetland mitigation plan. In addition, the submitted maps should clearly delineate the site perimeters, which will assist the PMs with locating the area during subsequent site inspections. Each map or diagram should be formatted to print on a standard 8 1/2 x 11” piece of paper and include a legend and the location of any photos submitted for review. As-built plans may be included as well.

v. Conclusions (1 page)

A general statement should be included that describes the conditions of the wetland mitigation project. If performance standards are not being met, a brief explanation of the difficulties and potential remedial actions proposed by the permittee or sponsor, including a timetable, should be provided. The District Commander will ultimately determine if the site is successful for a given monitoring period.

8. All wetland boundaries shall be marked in the field with signs and/or highly visible flagging until construction-related ground disturbance activities are complete.

9. The permittee will perform any corrective measures deemed necessary by the DE to insure the success of the wetland mitigation site.

10. Non-native plants and aggressive native cultivars such as switch grass (*Panicum virgatum*) shall not be used in seed mixes, and invasive species such as reed canary grass (*Phalaris arundinacea*), purple loosestrife (*Lythrum salicaria*), smooth brome grass (*Bromus inermis*), crown vetch (*Corinilla varia*), birdfoot trefoil (*Lotus corniculatus*), Canada thistle (*Cirsium arvense*), bull thistle (*Cirsium vulgare*), wild parsnip (*Pastinaca sativa*), common reed (*Phragmites australis*), Eurasian honeysuckles (*Lonicera spp.*), buckthorns (*Rhamnus cathartica* and *R. frangula*), Yellow Cress (*Rorippa sylvestris*), and white and yellow sweet clovers (*Melilotus alba* and *M. officinalis*) will be controlled.

11. The unaffected waters delineated within the adjacent project area must be protected during land leveling and construction activities. The jurisdictional waters may not be graded or used as staging areas, temporary crossings, temporary fill sites, etc. without prior authorization from the Corps of Engineers. Prior to the commencement of any physical work within the designated construction right-of-
way, the areas that are to remain undisturbed shall be clearly marked in the field and identified to the heavy equipment operators.

12. Appropriate soil erosion and sediment controls must be used and maintained in effective operating condition during construction, and all exposed soil and other fills, as well as any work below the ordinary high water mark or high tide line, must be permanently stabilized at the earliest practicable date. Permittees are encouraged to perform work within waters of the United States during periods of low-flow or no-flow.

13. Any land use conversion within the wetland mitigation area which may interfere with or be detrimental to the functions and values of these aquatic resources, is prohibited. Consistent with the Corps regulations the permittee is required to provide 60-day advance notification to the district engineer before any action is taken to void or modify the instrument, management plan, or long-term protection mechanism, including transfer of title to, or establishment of any other legal claims over, the compensatory mitigation site.

14. To preserve the mitigation site for its authorized purpose, there shall be no commercial, industrial or residential activity undertaken or allowed within the mitigation area. There shall be no buildings, dwellings, barns, roads, advertising signs, billboards or other structures built or placed in the mitigation area, except when provided in the original mitigation plan, the permittee may install a viewing site, outdoor seating facility along with a plaque or other historical signage, tree stands or water fowl hunting blinds; There shall be no dredging, filling, excavating, mining, drilling or removal of any topsoil, sand, gravel, rock, minerals or other materials.

15. To preserve the mitigation site for its authorized purpose, no plowing, tilling, cultivating, planting, timbering, or other agricultural activities may take place within the mitigation area except for the purposes described in the permittee's approved mitigation plan. The permittee is obligated to establish or re-establish vegetation through seedings or plantings in furtherance of that plan. Further, permittee may manipulate vegetation, topography and hydrology on the mitigation area through diking, pumping, water management, excavating, burning, cutting pesticide application and other suitable methods for the purpose of protecting, enhancing buffers, wetlands and wetland vegetation. The permittee is responsible for compliance with all federal, state and local laws governing the safety and maintenance of the property, including the control of noxious weeds within the mitigation area. Grazing of the mitigation area by domestic livestock is prohibited.

16. To ensure that the mitigation site can be maintained for its authorized purpose, the permittee must acquire, preserve and defend acquisition and any water or land rights where needed to maintain the ecological functions of the required mitigation. The permittee is obligated to install, operate and maintain water control structures for the purpose of protecting, re-establishing and enhancing wetlands and their functional values. This includes the right to transport construction materials to and from the site of any existing or proposed water control structure. The hydrology of the mitigation area will not otherwise be altered in any way or by any means including pumping, draining, diking, impounding or diverting surface or ground water into or out of the mitigation area.

17. As required by the mitigation rule, the permittee shall notify the district engineer within 60 days if the compensatory mitigation project is not achieving its performance standards as anticipated. The permittee shall provide 60-day advance notification to the district engineer if any action is taken to modify the approved mitigation plan. Remedial work may include re-grading and/or replanting the mitigation site. The permittee shall take immediate proactive steps necessary to correct any deficiencies outlined in the monitoring reports and shall coordinate with this office during implementation to insure compliance with the terms and conditions in this permit.
18. As required by the mitigation rule the permittee shall provide 60-day advance notification to the district engineer prior to any planned conveyance of mitigation lands for the district engineer's approval. The notification shall identify how and by whom the approved mitigation shall be accomplished. The permittee shall provide documentation of any conveyance in writing and by certified mail within 15 days after the conveyance. The responsible party identified in the permit shall retain all liability for maintaining adequate mitigation and accomplishing any needed corrective work should the district engineer determine that the mitigation is not satisfactory.

19. As required by the mitigation rule, the permittee's responsibility to complete the required compensatory mitigation will not be considered fulfilled until you have demonstrated mitigation success and have received written verification from the U.S. Army Corps of Engineers.

20. You are responsible for insuring that whoever performs, supervises, or oversees any portion of the physical work associated with the construction of the project has a copy of, is familiar with, and complies with all the terms and conditions of this permit.

21. You must take the actions required to record this permit with the Registrar of Deeds or other appropriate official charged with the responsibility for maintaining records of title to or interest in real property.

22. Finally, the Corps of Engineers determined the project is not likely to adversely affect federally threatened and endangered species provided all tree clearing occurs outside the maternity and swarming season of the Indiana bat (Myotis sodalis) and the northern long-eared bat (Myotis septentrionalis) which extends from April 1 to October 31. If you are unable to abide by the tree clearing restriction, you must notify the Corps of Engineers, and we will initiate consultation with the U.S. Fish and Wildlife Service.

Further information:
1. Congressional Authorities: You have been authorized to undertake the activity described above pursuant to:

- [ ] Section 10 of the Rivers and Harbors Act of 1899 (33 U.S.C. 403).

2. Limits of this authorization.
   a. This permit does not obviate the need to obtain other Federal, state, or local authorizations required by law.
   b. This permit does not grant any property rights or exclusive privileges.
   c. This permit does not authorize any injury to the property or rights of others.
   d. This permit does not authorize interference with any existing or proposed Federal project.
3. Limits of Federal Liability. In issuing this permit, the Federal Government does not assume any liability for the following:

   a. Damages to the permitted project or uses thereof as a result of other permitted or unpermitted activities or from natural causes.

   b. Damages to the permitted project or uses thereof as a result of current or future activities undertaken by or on behalf of the United States in the public interest.

   c. Damages to persons, property, or to other permitted or unpermitted activities or structures caused by the activity authorized by this permit.

   d. Design or construction deficiencies associated with the permitted work.

   e. Damage claims associated with any future modification, suspension, or revocation of this permit.

4. Reliance on Applicant's Data: The determination of this office that issuance of this permit is not contrary to the public interest was made in reliance on the information you provided.

5. Reevaluation of Permit Decision. This office may reevaluate its decision on this permit at any time the circumstances warrant. Circumstances that could require a reevaluation include, but are not limited to, the following:

   a. You fail to comply with the terms and conditions of this permit.

   b. The information provided by you in support of your permit application proves to have been false, incomplete, or inaccurate (See 4 above).

   c. Significant new information surfaces which this office did not consider in reaching the original public interest decision.

   Such a reevaluation may result in a determination that it is appropriate to use the suspension, modification, and revocation procedures contained in 33 CFR 325.7 or enforcement procedures such as those contained in 33 CFR 326.4 and 326.5. The referenced enforcement procedures provide for the issuance of an administrative order requiring you to comply with the terms and conditions of your permit and for the initiation of legal action where appropriate. You will be required to pay for any corrective measures ordered by this office, and if you fail to comply with such directive, this office may in certain situations (such as those specified in 33 CFR 209.170) accomplish the corrective measures by contract or otherwise and bill you for the cost.

6. Extensions. General condition 1 establishes a time limit for the completion of the activity authorized by this permit. Unless there are circumstances requiring either a prompt completion of the authorized activity or a reevaluation of the public interest decision, the Corps will normally give favorable consideration to a request for an extension of this time limit.
Your signature below, as permittee, indicates that you accept and agree to comply with the terms and conditions of this permit.

______________________________   _________________________
Permittee                          Date

The issuing officer for this permit is Mark J. Deschenes, Colonel, U.S. Army, Commander & District Engineer, Rock Island District.

This permit becomes effective when the Federal official, designated to act for the Secretary of the Army, and in accordance with CEMVR-OD-P appointment order dated 15 January 2008, has signed below.

______________________________   _________________________
Gene Walsh                        Date
Project Manager
Illinois/Missouri Section
Regulatory Branch

When the structures or work authorized by this permit are still in existence at the time the property is transferred, the terms and conditions of this permit will continue to be binding on the new owner(s) of the property. To validate the transfer of this permit and the associated liabilities associated with compliance with its terms and conditions, have the transferee sign and date below.

Transferee                        Date
NOTIFICATION OF ADMINISTRATIVE APPEAL OPTIONS AND PROCESS AND REQUEST FOR APPEAL

Applicant: Peoria City/County Landfill, Inc.  File Number: 2014-1499  Date: 04/27/15

Attached is:

X INITIAL PROFFERED PERMIT (Standard Permit or Letter of permission)  A
PROFFERED PERMIT (Standard Permit or Letter of permission)  B
PERMIT DENIAL  C
APPROVED JURISDICTIONAL DETERMINATION  D
X PRELIMINARY JURISDICTIONAL DETERMINATION  E

SECTION I - The following identifies your rights and options regarding an administrative appeal of the above decision. Additional information may be found at http://www.usace.army.mil/cecw/pages/reg_materials.aspx or Corps regulations at 33 CFR Part 331.

A: INITIAL PROFFERED PERMIT: You may accept or object to the permit.

* ACCEPT: If you received a Standard Permit, you may sign the permit document and return it to the district engineer for final authorization. If you received a Letter of Permission (LOP), you may accept the LOP and your work is authorized. Your signature on the Standard Permit or acceptance of the LOP means that you accept the permit in its entirety, and waive all rights to appeal the permit, including its terms and conditions, and approved jurisdictional determinations associated with the permit.

* OBJECT: If you object to the permit (Standard or LOP) because of certain terms and conditions therein, you may request that the permit be modified accordingly. You must complete Section II of this form and return the form to the district engineer. Your objections must be received by the district engineer within 60 days of the date of this notice, or you will forfeit your right to appeal the permit in the future. Upon receipt of your letter, the district engineer will evaluate your objections and may: (a) modify the permit to address all of your concerns, (b) modify the permit to address some of your objections, or (c) not modify the permit having determined that the permit should be issued as previously written. After evaluating your objections, the district engineer will send you a proffered permit for your reconsideration, as indicated in Section B below.

B: PROFFERED PERMIT: You may accept or appeal the permit

* ACCEPT: If you received a Standard Permit, you may sign the permit document and return it to the district engineer for final authorization. If you received a Letter of Permission (LOP), you may accept the LOP and your work is authorized. Your signature on the Standard Permit or acceptance of the LOP means that you accept the permit in its entirety, and waive all rights to appeal the permit, including its terms and conditions, and approved jurisdictional determinations associated with the permit.

* APPEAL: If you choose to decline the proffered permit (Standard or LOP) because of certain terms and conditions therein, you may appeal the declined permit under the Corps of Engineers Administrative Appeal Process by completing Section II of this form and sending the form to the division engineer. This form must be received by the division engineer within 60 days of the date of this notice.

C: PERMIT DENIAL: You may appeal the denial of a permit under the Corps of Engineers Administrative Appeal Process by completing Section II of this form and sending the form to the division engineer. This form must be received by the division engineer within 60 days of the date of this notice.

D: APPROVED JURISDICTIONAL DETERMINATION: You may accept or appeal the approved JD or provide new information.

* ACCEPT: You do not need to notify the Corps to accept an approved JD. Failure to notify the Corps within 60 days of the date of this notice, means that you accept the approved JD in its entirety, and waive all rights to appeal the approved JD.

* APPEAL: If you disagree with the approved JD, you may appeal the approved JD under the Corps of Engineers Administrative Appeal Process by completing Section II of this form and sending the form to the division engineer. This form must be received by the division engineer within 60 days of the date of this notice.

E: PRELIMINARY JURISDICTIONAL DETERMINATION: You do not need to respond to the Corps regarding the preliminary JD. The Preliminary JD is not appealable. If you wish, you may request an approved JD (which may be appealed), by contacting the Corps district for further instruction. Also you may provide new information for further consideration by the Corps to reevaluate the JD.
SECTIN II - REQUEST FOR APPEAL or OBJECTIONS TO AN INITIAL PROFFERED PERMIT

REASONS FOR APPEAL OR OBJECTIONS: (Describe your reasons for appealing the decision or your objections to an initial proffered permit in clear concise statements. You may attach additional information to this form to clarify where your reasons or objections are addressed in the administrative record.)

ADDITIONAL INFORMATION: The appeal is limited to a review of the administrative record, the Corps memorandum for the record of the appeal conference or meeting, and any supplemental information that the review officer has determined is needed to clarify the administrative record. Neither the appellant nor the Corps may add new information or analyses to the record. However, you may provide additional information to clarify the location of information that is already in the administrative record.

POINT OF CONTACT FOR QUESTIONS OR INFORMATION:

<table>
<thead>
<tr>
<th>If you have questions regarding this decision and/or the appeal process you may contact:</th>
<th>If you only have questions regarding the appeal process you may also contact:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Mr. Gene Walsh  U.S. Army Corps of Engineers  Clock Tower Building  P.O. Box 2004  Rock Island, Illinois 61204-2004  (309)794-5674</td>
<td>Mr. Thomas McCabe, CEMVD-PD-OD  Administrative Appeals Review Officer  Mississippi Valley Division  P.O. Box 80  Vicksburg, MS 39181-0080  601-634-5820  FAX: 601-634-5816</td>
</tr>
</tbody>
</table>

RIGHT OF ENTRY: Your signature below grants the right of entry to Corps of Engineers personnel, and any government consultants, to conduct investigations of the project site during the course of the appeal process. You will be provided a 15 day notice of any site investigation, and will have the opportunity to participate in all site investigations.

Signature of appellant or agent.

PRELIMINARY JURISDICTIONAL DETERMINATION FORM

This preliminary JD finds that there “may be” waters of the United States on the subject project site, and identifies all aquatic features on the site that could be affected by the proposed activity, based on the following information:

- **District Office**: Rock Island District
- **File/ORM #**: 2014-1499
- **PJD Date**: Apr 27, 2015
- **State**: IL
- **City/County**: Peoria County
- **Nearest Waterbody**: Coal Hollow Run and Warsaw Run
- **Location**: TRS, Lat/Long or UTM: Lat 40.744020438, Long -89.790802239
- **Name**: Mr. Christopher Coulter
- **Address of Person Requesting PJD**: Peoria City/County Landfill, Inc. 4700 N Sterling Avenue Peoria, Illinois 61615

Amount of Waters in the Review Area:
- Non-Wetland Waters: linear ft width acres
- Wetlands: 4.52 acre(s) Cowardin Class: Palustrine, emergent

Identify (Estimate) Name of Any Water Bodies on the Site Identified as Section 10 Waters:
- Tidal:
- Non-Tidal:
- Office (Desk) Determination: Date of Field Trip:

SUPPORTING DATA: Data reviewed for preliminary JD (check all that apply - checked items should be included in case file and, where checked and requested, appropriately reference sources below):

- Maps, plans, plots or plat submitted by or on behalf of the applicant/consultant: CB & I Environmental & Infrastructure, Inc.
- Data sheets prepared/submitted by or on behalf of the applicant/consultant:
- Office concurs with data sheets/delineation report.
- Office does not concur with data sheets/delineation report.
- Data sheets prepared by the Corps:
- Corps navigable waters’ study:
- U.S. Geological Survey Hydrologic Atlas:
- USGS NHD data.
- USGS 8 and 12 digit HUC maps.
- U.S. Geological Survey map(s). Cite quad name: Hanna City, IL.
- USDA Natural Resources Conservation Service Soil Survey. Cite information:
- National wetlands inventory map(s). Cite name:
- State/Local wetland inventory map(s):
- FEMA/HRM maps:
- 100-year Floodplain Elevation:
- Photographs: Aerial (Name & Date):
- Other (Name & Date):
- Previous determination(s). File no. and date of response letter:
- Other information (please specify):

IMPORTANT NOTE: The information recorded on this form has not necessarily been verified by the Corps and should not be relied upon for later jurisdictional determinations.

**Signature and Date of Person Requesting Preliminary JD**

**Signature and Date of Regulatory Project Manager (REQUIRED)**

**Explanations of Preliminary and Approved Jurisdictional Determinations:**

1. The Corps of Engineers believes that there may be jurisdictional waters of the United States on the subject site, and the permit applicant or other affected party who requested this preliminary JD is hereby advised of his or her option to request and obtain an approved jurisdictional determination (JD) for that site. Nevertheless, the permit applicant or other person who requested this preliminary JD has declined to exercise the option to obtain an approved JD in this instance and at this time.

2. In any circumstance where a permit applicant obtains an individual permit, or a Nationwide General Permit (NWP) or other general permit verification requiring “preconstruction notification” (PCN), or requests verification for a non-reporting NWP or other general permit, and the permit applicant has not requested an approved JD for the activity, the permit applicant is hereby made aware of the following: (1) the permit applicant has elected to seek a permit authorization based on a preliminary JD, which does not make an official determination of jurisdictional waters; (2) the applicant has the option to request an approved JD before accepting the terms and conditions of the permit authorization, and that basing a permit authorization on an approved JD could possibly result in less compensatory mitigation being required or different special conditions; (3) that the applicant has the right to request an individual permit rather than accepting the terms and conditions of the NWP or other general permit authorization; (4) that the applicant can accept a permit authorization and thereby agree to comply with all the terms and conditions of that permit, including whatever mitigation requirements the Corps has determined to be necessary; (5) that undertaking any activity in reliance upon the permit authorization without requesting an approved JD constitutes the applicant’s acceptance of the use of the preliminary JD, but that other form of JD will be processed as soon as practicable; (6) accepting a permit authorization (e.g., signing a prefilled individual permit) or undertaking any activity in reliance on any form of Corps permit authorization based on a preliminary JD constitutes agreement that all wetlands and other water bodies on the site affected in any way by that activity are jurisdictional waters of the United States, and precludes any challenge to such jurisdiction in any administrative or judicial compliance or enforcement action, or in any administrative appeal or in any Federal court; and (7) whether the permit applicant to use either an approved JD or a preliminary JD, that JD will be processed as soon as is practicable. Further, an approved JD, a prefilled individual permit (and all terms and conditions contained therein), or individual permit denial can be administratively appealed pursuant to 33 C.F.R. Part 331, and that in any administrative appeal, jurisdictional issues can be raised (see 33 C.F.R. 331.5(a)(2)). If, during that administrative appeal, it becomes necessary to make an official determination whether CWA jurisdiction exists over a site, or to provide an official delineation of jurisdictional waters on the site, the Corps will provide an approved JD to accomplish that result, as soon as is practicable.
This preliminary JD finds that there "may be" waters of the United States on the subject project site, and identifies all aquatic features on the site that could be affected by the proposed activity, based on the following information:

Notes:

The review area of this jurisdictional determination was limited to the potential permit area for the project. Other waters of the United States (including wetlands) exist beyond the limits of the proposed review area. Any future discharges of dredged and/or fill material into waters of the U.S. will require Department of the Army authorization.
REQUEST FOR DISCUSSION

To: Peoria City/County Landfill Committee Members
From: Mike Wiersema & Dan Erni, Waste Management

AGENDA DATE REQUESTED: May 20, 2015

ACTION REQUESTED: Receive and file monthly reports.

BACKGROUND: Attached is the monthly activity report through April 2015.

1. All weekly random load checks were completed and documented with no issues to report.

2. Illinois EPA resumed work on renewing the site’s Title V air permit, and requested additional information for both LF#1 and LF#2. We are working with Foth to meet the requested submittal deadline of May 15th, and will have Mr. Bergsten sign the appropriate forms once reviewed and approved by Foth.

3. We respectfully request Mr. Bergsten’s signatures on permit application forms for reports documenting construction of an expansion of the gas collection system, 10 acres of final cover, and Cell 6. The submittals will be subject to review and approval in advance by Foth.

4. To allow sufficient time to respond to short-term submittal requirements that may arise prior to the next Landfill Committee meeting, we respectfully request authorization for Mr. Bergsten to sign such documents, subject to review and approval in advance by Foth.

FINANCIAL IMPACT: NA
