Slurry Seal road projects to begin Monday throughout the City

Road revitalization projects will occur in all five Council districts

August 4, 2022 (Peoria, IL) The 2022 Slurry Seal Project will begin next week on various City streets. These pavement improvements are scheduled to begin on Monday, August 8, and will last approximately one week, weather permitting.

Residents directly impacted by the project will be notified with a door hanger 24 to 48 hours in advance of the work. **When notified, residents will be asked to remove all vehicles parked on the streets. No parking areas will remain in effect until the project has been completed and the no parking signs have been removed.** No parking and other traffic signs will be placed on selected streets and residents may be required to find alternative, off-street parking.

The contractor will attempt to knock on doors to notify residents that the work is about to start on their street. Driveways may have limited access for 1-2 hours during the process. Emergency vehicles will have access at all times.

Slurry Seal is a mixture of polymer-modified asphalt emulsion, mineral filler, water, and aggregate. Slurry Seal protects and prolongs the life expectancy of the pavement's surface. The work will be performed on both sides of the road with the entire road being closed for a few hours.

This work is part of the Public Works Department's 2022 Pavement Preservation Program. The City appreciates the public's patience while these roadway treatments are applied to extend the life of the pavement.
